Step 1 — Camera

⚠️ Make sure the device is completely turned off before you begging taking it apart to avoid electrocution risks.

● Place the tablet face-up on a flat table.

Step 2

● Starting near the headphone port, fit the flat end of the spudger in between the screen and back case.

● Pry the back case from the screen around each point on the device to release the clips securing the case halves to each other.
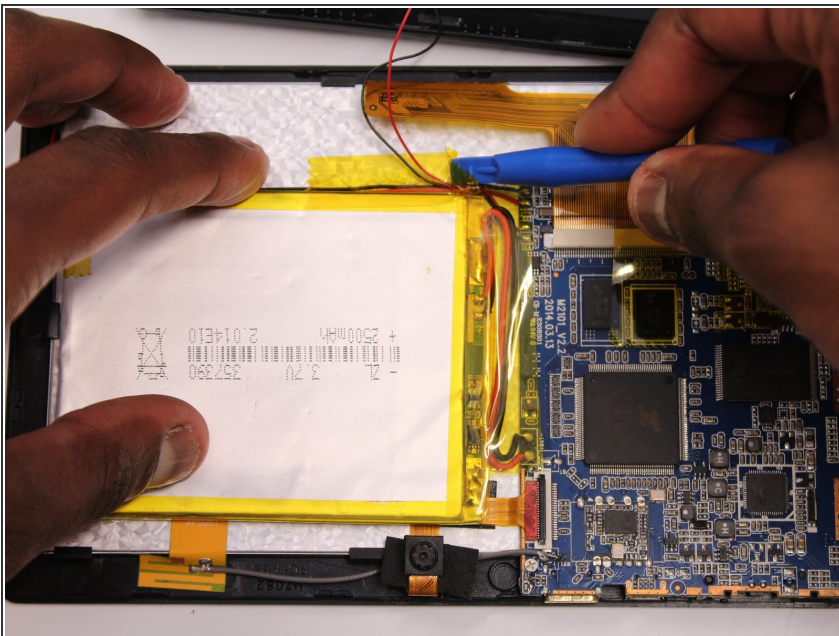

Step 3

- Gently remove the back case of the device and lay it in a flat surface as shown in the photo.

⚠️ **Make sure not to sever the wires (red and black) connected to the speaker that is located in the back case.**
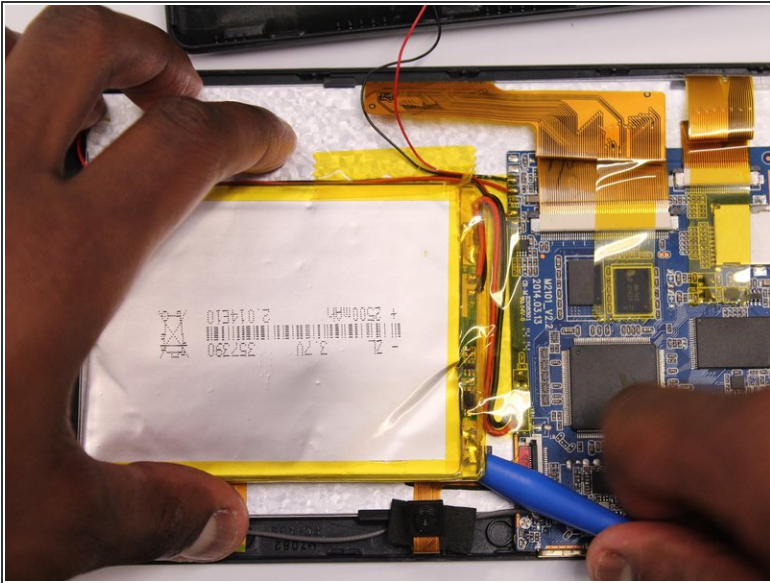

Step 4

- Remove only the yellow tape that touches the battery.

⚠️ **Be careful not to cut or damage the wires (red and black) that are under the yellow tape.'**
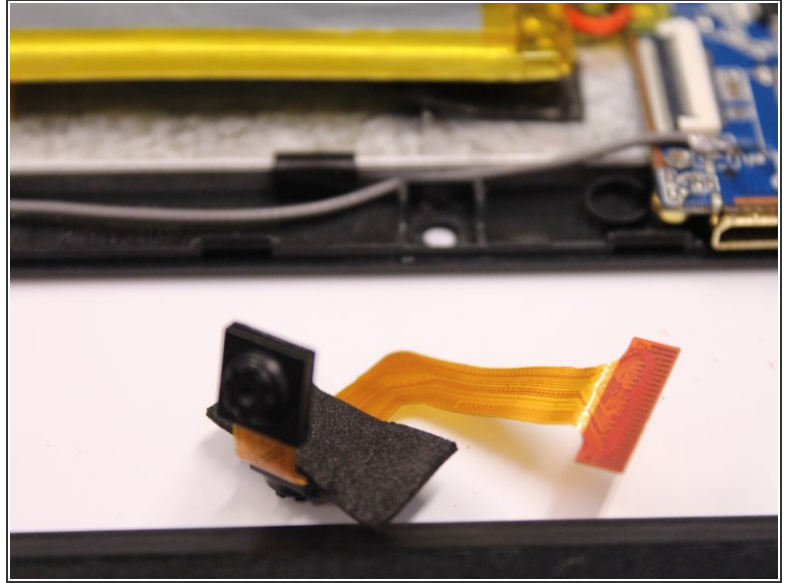

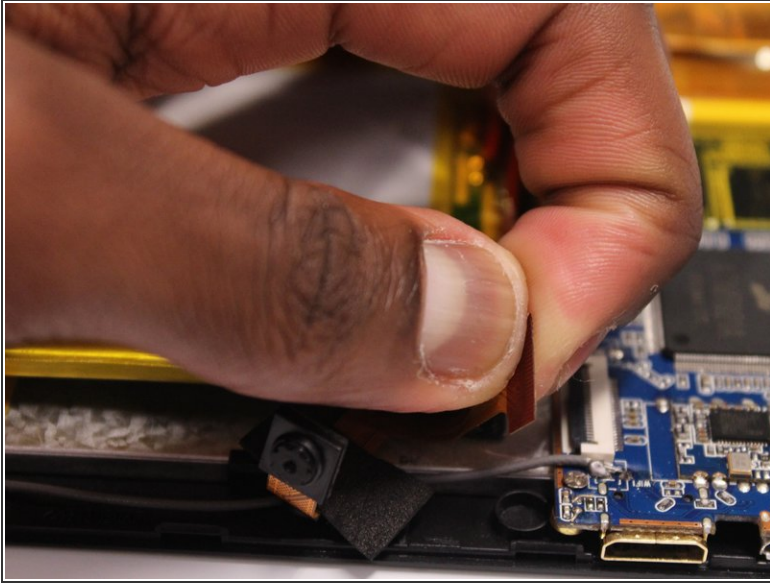

Step 5

- Use the flat end of the spudger to gently pry the top left corner battery from the back of the screen in order to access the camera.

Step 6

- Use the spudger to lift the black clamp as shown in the photo to disconnect the camera from the motherboard.

Step 7

- Disconet the camera from the motherboard.

- Pull the camera from the back of the screen.

To reassemble your device, follow these instructions in reverse order.
