## INTRODUCTION

In this replacement guide you will learn the steps to replace the power button on your Protocol DURA VR drone remote.

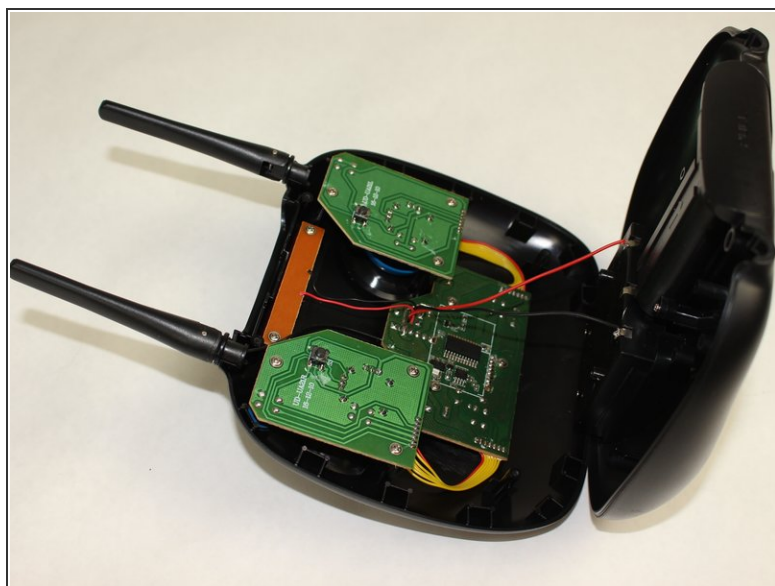

---

### TOOLS:

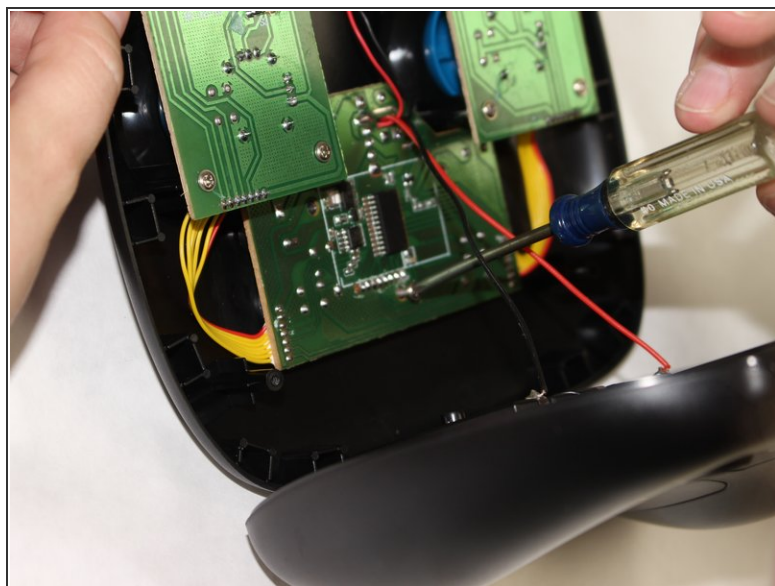

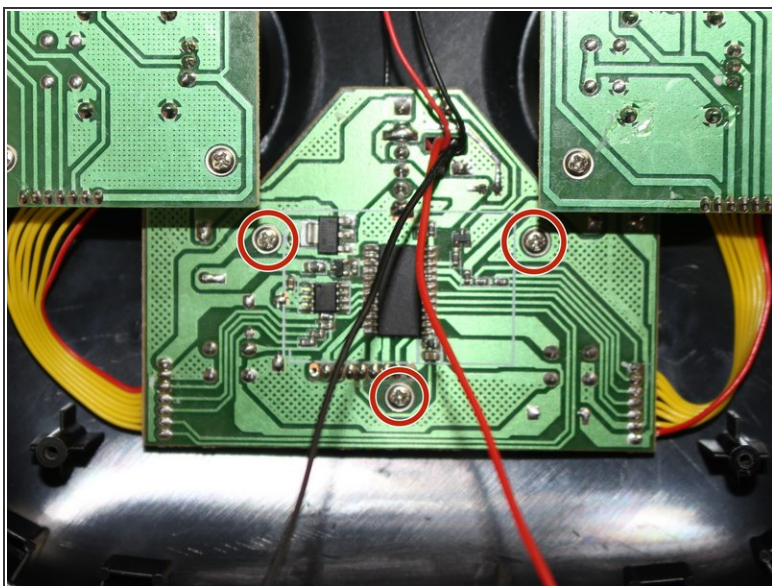

- [Phillips #0 Screwdriver](#) (1)
-

## Step 1 — Remote Power Button

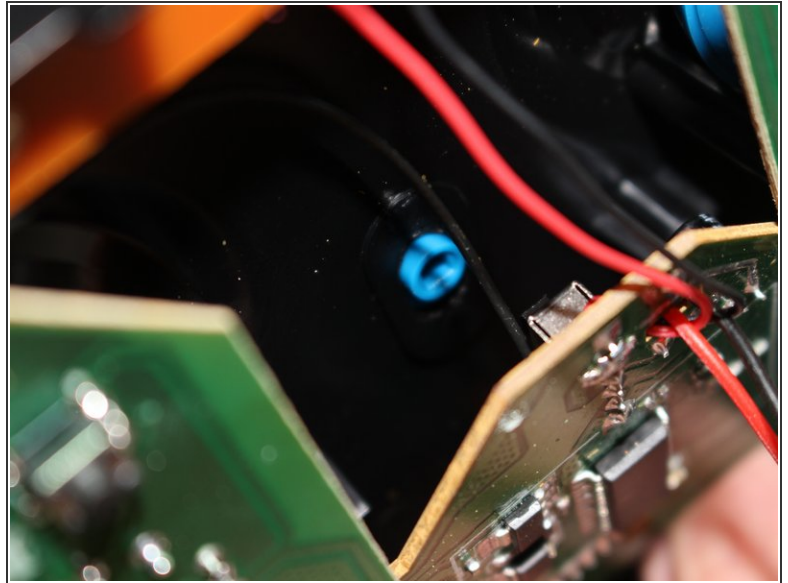

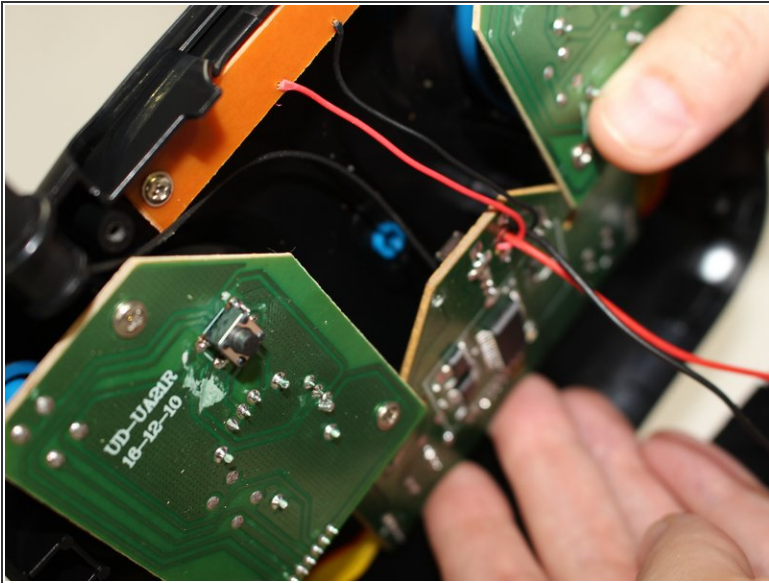

- Remove the four 0.8mm Phillips #0 screws from the back casing of the remote.

## Step 2

- Remove the three 0.7mm Phillips #0 screws from the motherboard.

### Step 3

- Move the motherboard up to allow room for the power button to become visible and loose.

### Step 4

- Place the remote face up. Then pick up the broken power button and replace with a new button.

To reassemble your device, follow these instructions in reverse order.
