

Protocol Dronium 3x Controller Battery Replacement

How to replace the batteries for the Protocol Dronium 3x controller.

Written By: Alexander George

INTRODUCTION

The Protocol Dronium 3x remote controller is used to control the drone. The controller uses 4 AA batteries that are accessed on the back side of the controller. The Protocol Dronium 3x can also be controlled via the Protocol app on both the Apple App Store and Google Play Store.

TOOLS:

- Phillips #0 Screwdriver (1)

PARTS:

- AA Battery (4)

Step 1 — Controller Battery

- Ensure the controller is powered off.
- Using a Phillips #0 screwdriver, unscrew the screw holding the battery lid on the controller. Keep in mind that the screw will be attached to the lid.
- Remove lid and screw.

Step 2

- Remove batteries from battery compartment.
- Discard the used batteries.

Place new batteries in the controller in the correct orientation.

To reassemble your device, follow these instructions in reverse order.
