

Protocol Dronium 3x Drone Battery Replacement

How to replace the battery for the .Protocol Dronium 3x.

Written By: Alexander George

INTRODUCTION

The Protocol Dronium 3x drone battery is located on the underside of the drone. The battery is a proprietary to the drone and can also be recharged. If the battery is dead or no longer working, be sure to dispose of it properly and replace with only official Protocol batteries to avoid damaging the drone.

Step 1 — Drone Battery

- Flip the drone upside-down.
- Ensure that the drone is powered off.
- Press down on the battery tab and push the battery outward.
- Discard the old battery.

To reassemble your device, follow these instructions in reverse order.
