

Protocol Videodrone AP Propellers Replacement

This Guide will show you how to replace the propellers.

Written By: Serge

INTRODUCTION

This guide will be used to replace the propellers. The only tool you will need to use a #0 Phillips head screwdriver.

TOOLS:

- [Phillips #0 Screwdriver](#) (1)

PARTS:

- [Protocol VideoDrone AP Spare Parts](#) (1)

Step 1 — Propellers

- Make sure that the drone is powered off

Step 2

- Using #0 Philips head screwdriver, unscrew the four propellers.
- ⓘ If screw is stuck in the propeller, turn over and insert the screw driver and pop out the screw.

Step 3

- Take the replacement propeller, and align it with the screw point
- Screw in the new propellers

To reassemble your device, follow these instructions in reverse order.
