🔧 TOOLS:

- iFixit Opening Tools (1)
- Phillips #00 Screwdriver (1)
Step 1 — Open Quantum View case

- Start by turning the tablet over with the screen down. Carefully use a plastic opening tool to pry the cover off. Start from the corner opposite the hibernate button.

Step 2 — Removing the electrical tape and magnets.

- Pick up the magnets from the bottom edge of the tablet next to the keyboard connection and put them in a place that they will not get lost. Then carefully remove all 4 strips of electrical tape.

Step 3 — Unhooking the battery

- Using a small plastic opening tool; genteelly pull the connection off of the motherboard.

## Step 4 — Remove speaker clip

- Remove yellow plastic and carefully pull clip away from connection.

Step 5 — Remove camera clip

- Remove yellow tape.

- Unclip ribbon connector.

Step 6 — Remove camera

- Unscrew plastic camera holder using a PH00 screwdriver bit.

- Release the plastic holder tab and remove camera.
