

Quiksilver The Fifty50 Analog Battery Replacement

Teach someone how to take out the analog battery in the Quiksilver The Fifty50 sports watch.
Essential steps for replacing the analog battery.

Written By: Sue Giske

INTRODUCTION

If your Quiksilver The Fifty50 sports watch has not been turning on or seems to be having battery issues this guide will successfully teach someone how to remove the analog battery. Before getting started make sure to grab the tools necessary and at least skim the instructions once to understand what it will look like while you are replacing the battery, that way there will be no surprises as you go through the steps.

TOOLS:

- [Tweezers](#) (1)
- [Magnetic Telescoping Pick-Up Tool](#) (1)
- [Phillips #00 Screwdriver](#) (1)

Step 1 — Strap

- Place the watch (face down) on a solid surface.
- Carefully use the screwdriver and push in one side of the strap.
- Slowly remove the strap by pushing back one of the hidden metallic holders for the strap.

(i) If you are having difficulty trying to take off the strap, feel free to use a 3.5 flat head screw driver, or any kind of tool that make this step easier.

Step 2

- Gently pull the pin out of the strap.
- ⓘ Carefully handle the small metallic holder, as they are sharp and may be hard to find if fall out.

Step 3 — Back Panel

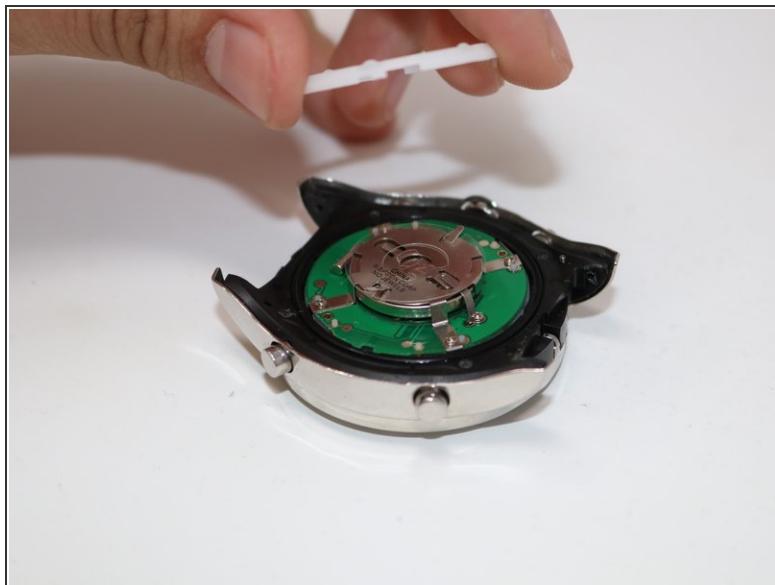

- Remove the four 1.1 mm screws holding the back panel in place using the Phillips #00 screwdriver.

Step 4

- Carefully separate the panel off of the watch.
- *i* Careful not to lose the four 1.1 mm screw or else the back panel will not be able to put back.

Step 5 — Analog Battery

- Carefully lift the white plastic circular out of the watch.

Step 6

- Remove the four 1.1 mm screws located on the metallic holder using the Phillips #00 screwdriver.

Step 7

- Remove the large circular Analog battery.

To reassemble your device, follow these instructions in reverse order.
