Step 2

- Remove the two Phillips screws from the bottom of the device, next to the charger port and Compact Flash release button.

- Pull the silver case from the bottom of the device.

Step 3
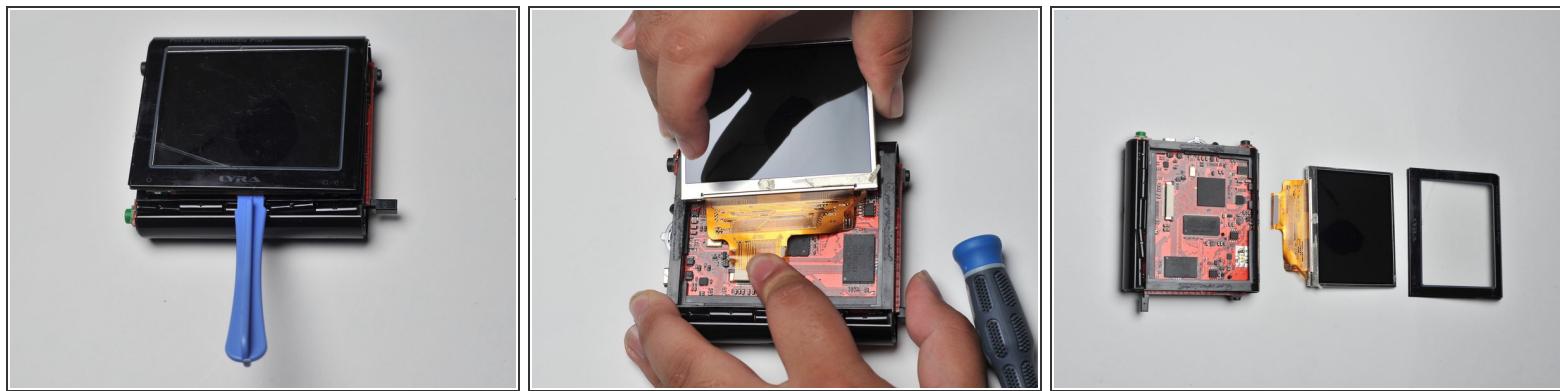

- Carefully pry up the screen with a plastic opening tool.

- Disconnect the screen's ribbon cable from the circuit board.

- Remove the screen.

Step 4 — Motherboard
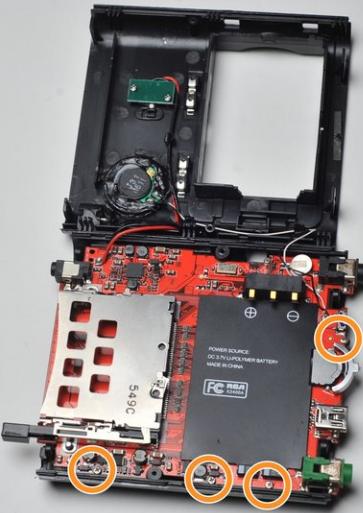

- Open the case of the Lyra.

- Remove the four screws that secure the motherboard to the frame of the Lyra X2400.

Step 5 — USB in/out
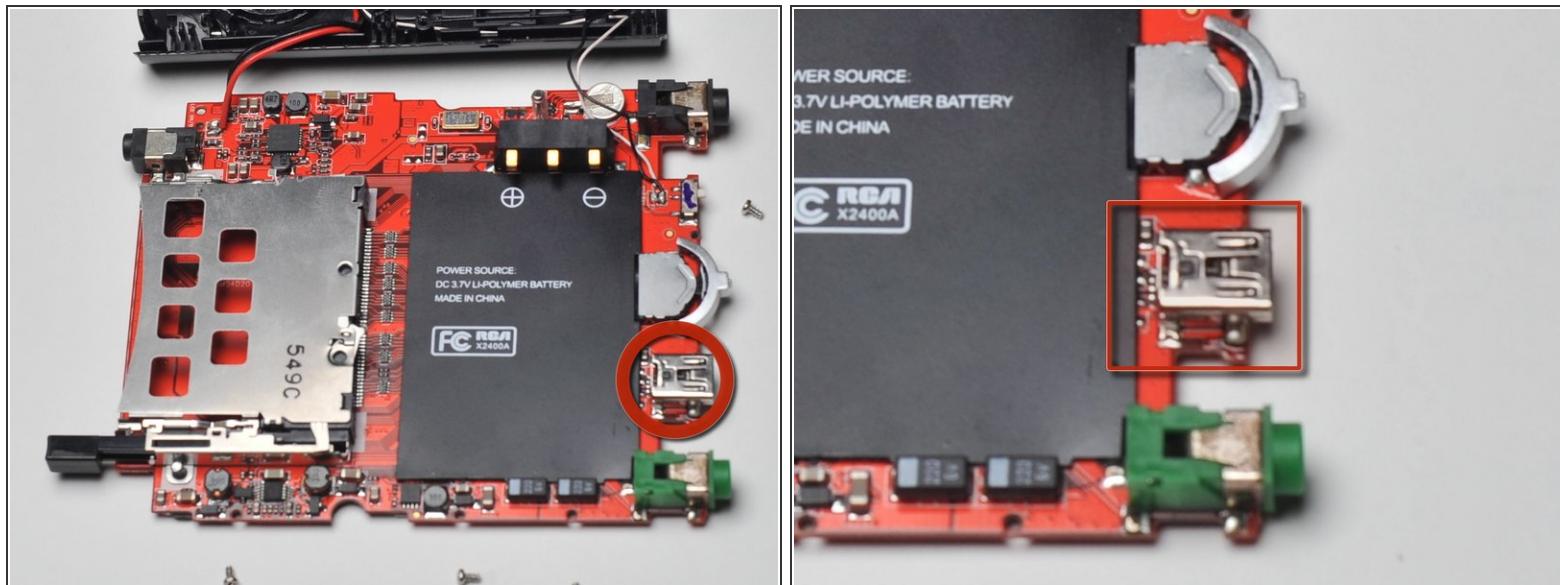

- Locate the USB in/out component on your Lyra X2400. If you are having difficulty locating this component the picture to the left will show you where it is located.

- Start using solder/desolder tools to remove the USB in/out.

- Once removed replace it with the new working USB in/out.
  - Use the soldering tools to reattach the component back to the main logic board.

To reassemble your device, follow these instructions in reverse order.
