Step 2

- Press a plastic opening tool into the space between the front and back portions of the case.

- Run it along the perimeter of the device to unhook the many plastic tabs.

- Gently pull both sides apart.

  ⚠ The speaker is connected to the back cover so be careful when separating

Step 3 — Battery

- Use a soldering iron to remove the soldered connections from the battery to the motherboard.

- ⚠ For your safety and to ensure a correct repair, be sure to exercise caution when using the soldering iron.

- ⓘ For more information about soldering, check out this guide.

Step 4

- Using a spudger, pry the battery off of the rest of the body

- ⓘ The battery is taped on with double sided tape. It would be a good idea to have another strip to reattach the battery.

To reassemble your device, follow these instructions in reverse order.
