

RCA RCT6272W23 Display Replacement

Replace the display screen on your device

Written By: Ross Pennala

INTRODUCTION

In this guide, you will learn how to replace the display screen on your device

TOOLS:

- [Phillips #00 Screwdriver](#) (1)
- [iFixit Opening Tools](#) (1)
- [Soldering Iron](#) (1)
- [Spudger](#) (1)

Step 1 — Case

- Use a philips #00 screwdriver to unscrew both 4.064mm screws at the top of the device which hold it together.

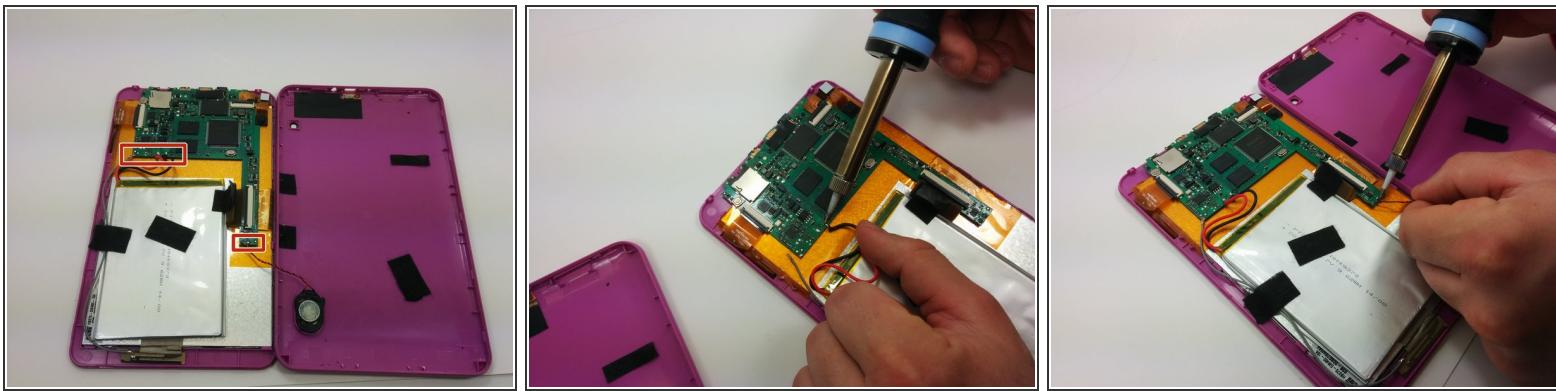

Step 2

- Press a plastic opening tool into the space between the front and back portions of the case.
- Run it along the perimeter of the device to unhook the many plastic tabs.
- Gently pull both sides apart.

 The speaker is connected to the back cover so be careful when separating

Step 3 — Motherboard

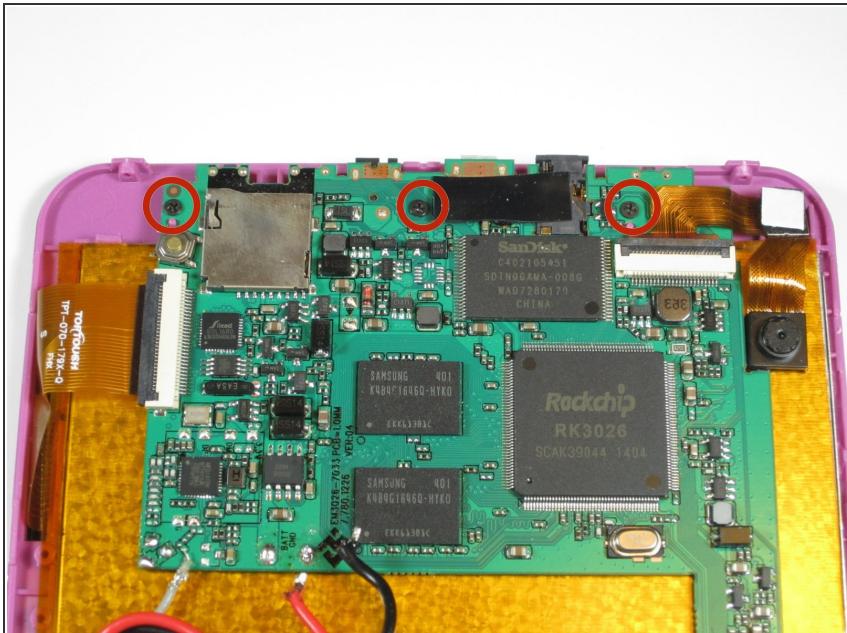

- Use a soldering iron to remove the soldered connections on the motherboard

⚠ For your safety and to ensure a correct repair, be sure to exercise caution when using the soldering iron.

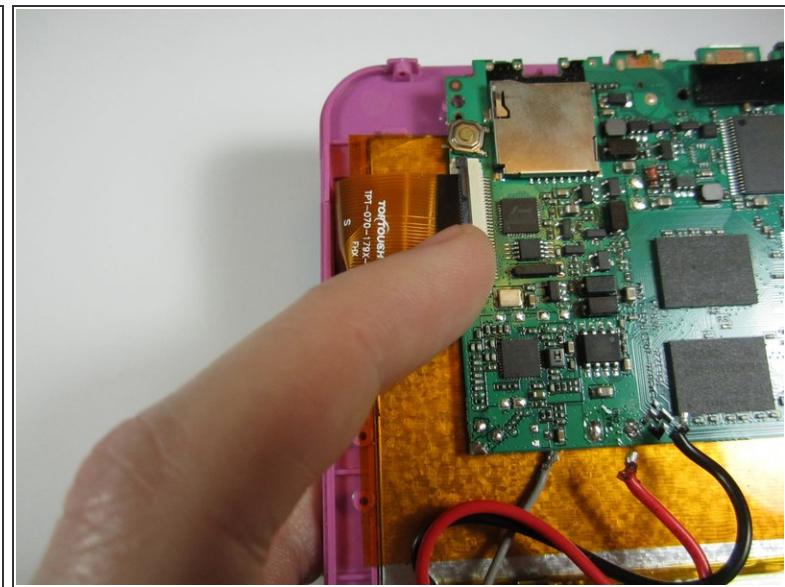

ⓘ For more information about soldering, check out this [guide](#).

Step 4

- Use a philips #00 screwdriver to unscrew the three 4.064mm screws which attach the motherboard to the front of the device.

Step 5

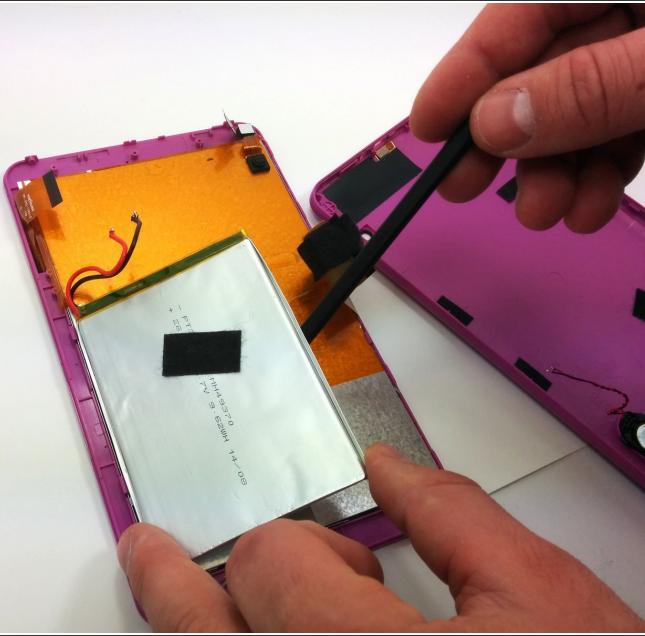

- Use your fingers to pop the three black tabs up to release the flat plastic data transfer cables.

Step 6

- Pull up the motherboard from the rest of the body.

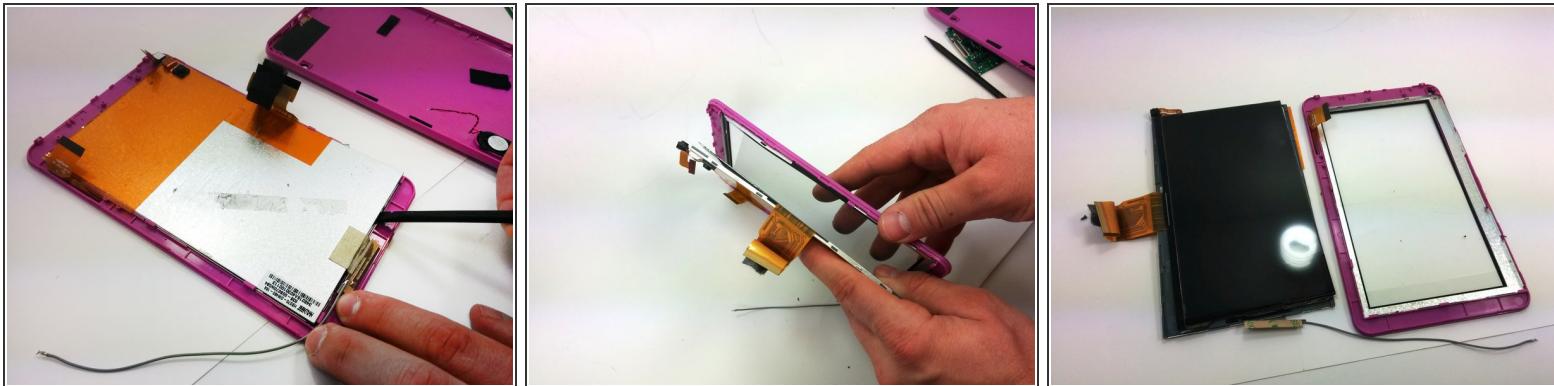

Step 7 — Display

- Using a plastic opening tool, pry the battery off of the rest of the body

(i) The battery is taped on with double sided tape. It would be a good idea to have another strip to reattach the battery.

Step 8

- Using a spudger, separate the display surface and the front cover

⚠ Be careful not to break the tabs that hold the display screen in place

(i) A second spudger may be necessary to help hold the position of the display screen

To reassemble your device, follow these instructions in reverse order.
