Step 1 — Rubber Feet

- Turn the keyboard over so that it is lying flat on its face.

- Use the iFixit opening tool to pry the rubber feet off the keyboard.
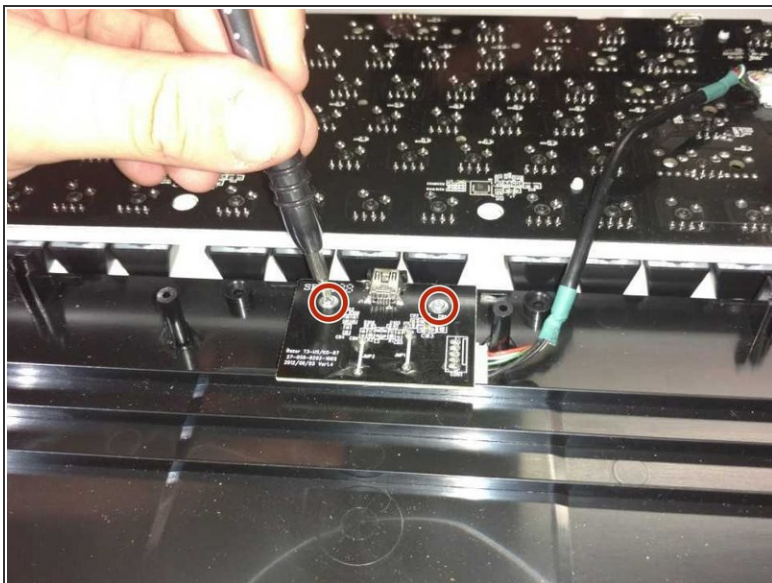

Step 2 — Front Panel

- Use a Phillips #1 screwdriver to remove the six screws on the back of the keyboard.

- Then use the IFixIt opening tool to pry off the front panel.

- Place the keyboard over so the keys are facing up.

- Lift both ends of the keyboard up removing the front panel.

Step 3 — Back Panel

- Use a Philips #1 Screwdriver to remove the four screws located below the keys.

- Lift the main circuit board and flip it over, placing it on its top.

  ⚠ Be cautious of the wire connected to the USB Port Board.

Step 4

- Use a Philips #1 Screwdriver to remove the two screws located on the bottom of the USB Port Board.

- Lift the USB Port Board and place it to the side.

To reassemble your device, follow these instructions in reverse order.
