

Razer Blade Stealth 2016 Heat Sink Replacement

This guide is created to help users replace the heat sink of the Razer Blade Stealth (2016).

Written By: Lindsay Grant

INTRODUCTION

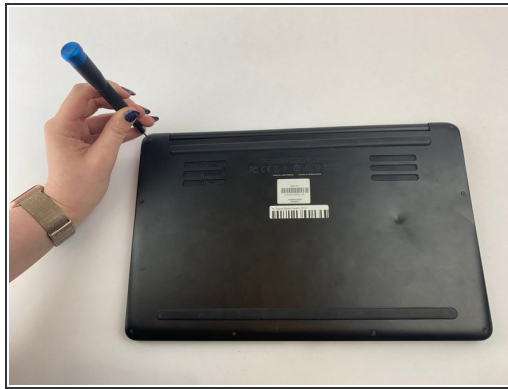

Follow this guide if you want to replace the heat sink of the Razer Blade Stealth (2016).

TOOLS:

- [T4 Torx Screwdriver](#) (1)
 - [Phillips #00 Screwdriver](#) (1)
-

Step 1 — Battery

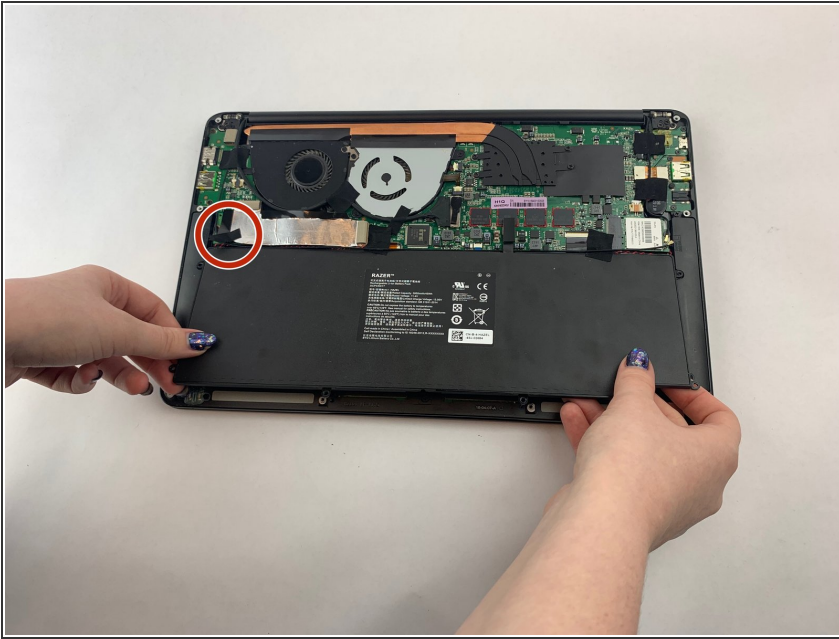

- Use a Torx 4 screwdriver to remove the eight 3.04 mm screws on the back case and remove the rear cover by prying up lightly starting in one of the corners.

Step 2

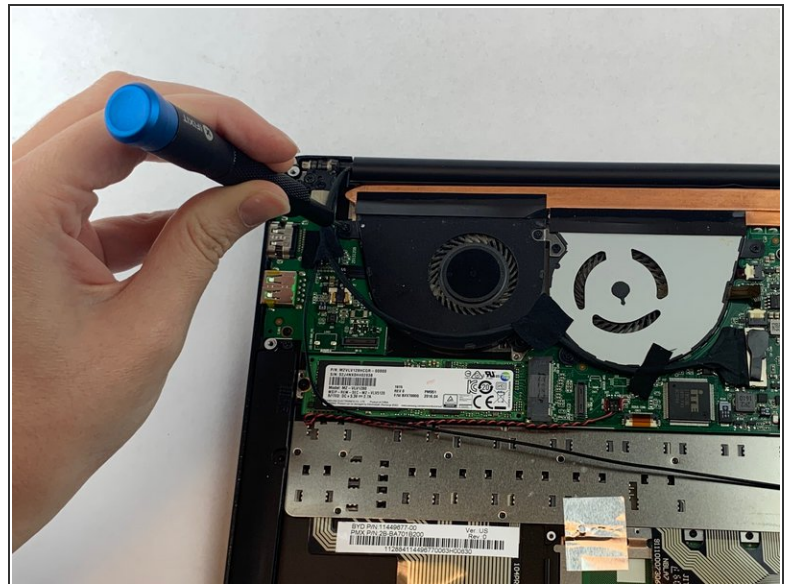

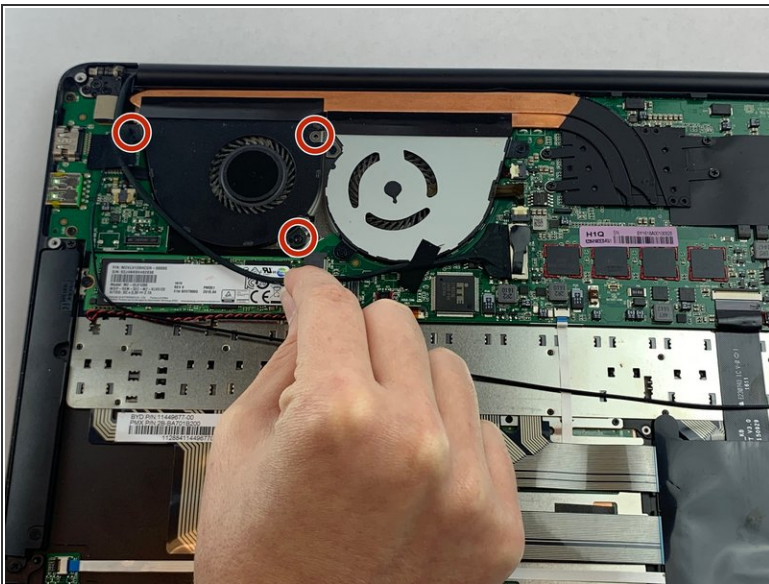

- Remove the battery carefully by removing the six screws using the T4 Torx screwdriver.

Step 3

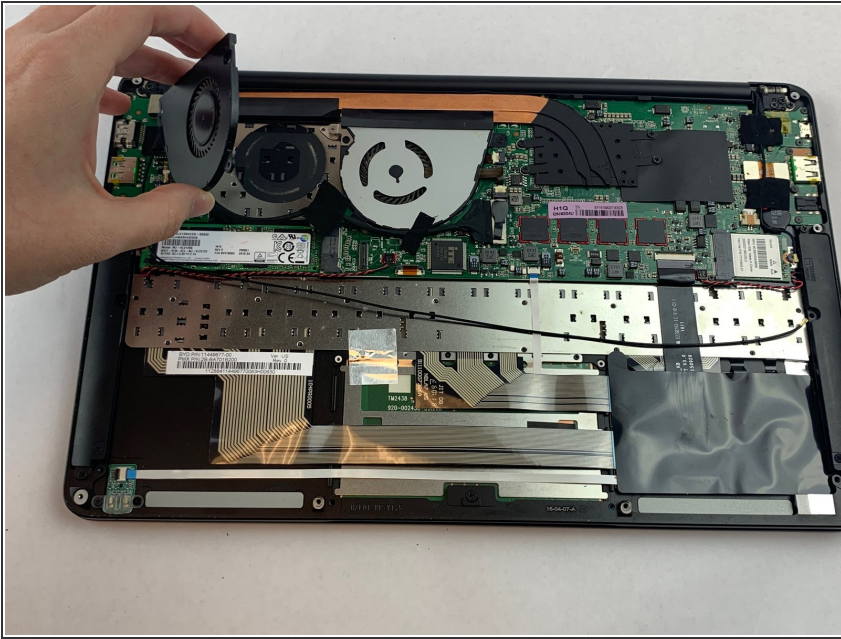

- Unplug and remove battery from the device.

Step 4 — Fans

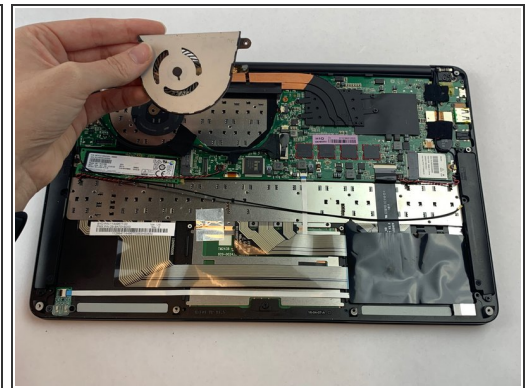

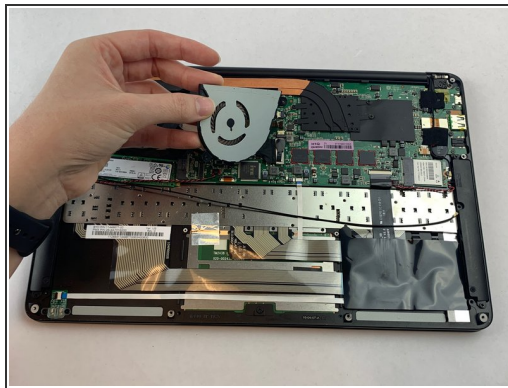

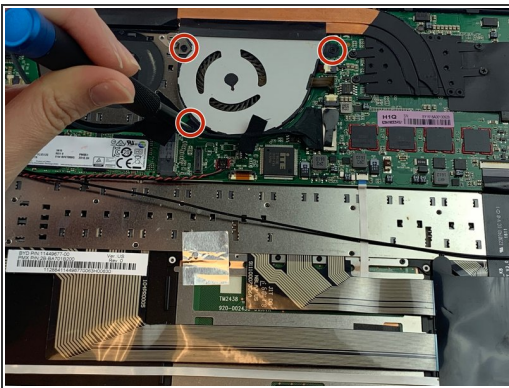

- Remove the three 3.38 mm screws from the left fan (this fan should be black).

Step 5

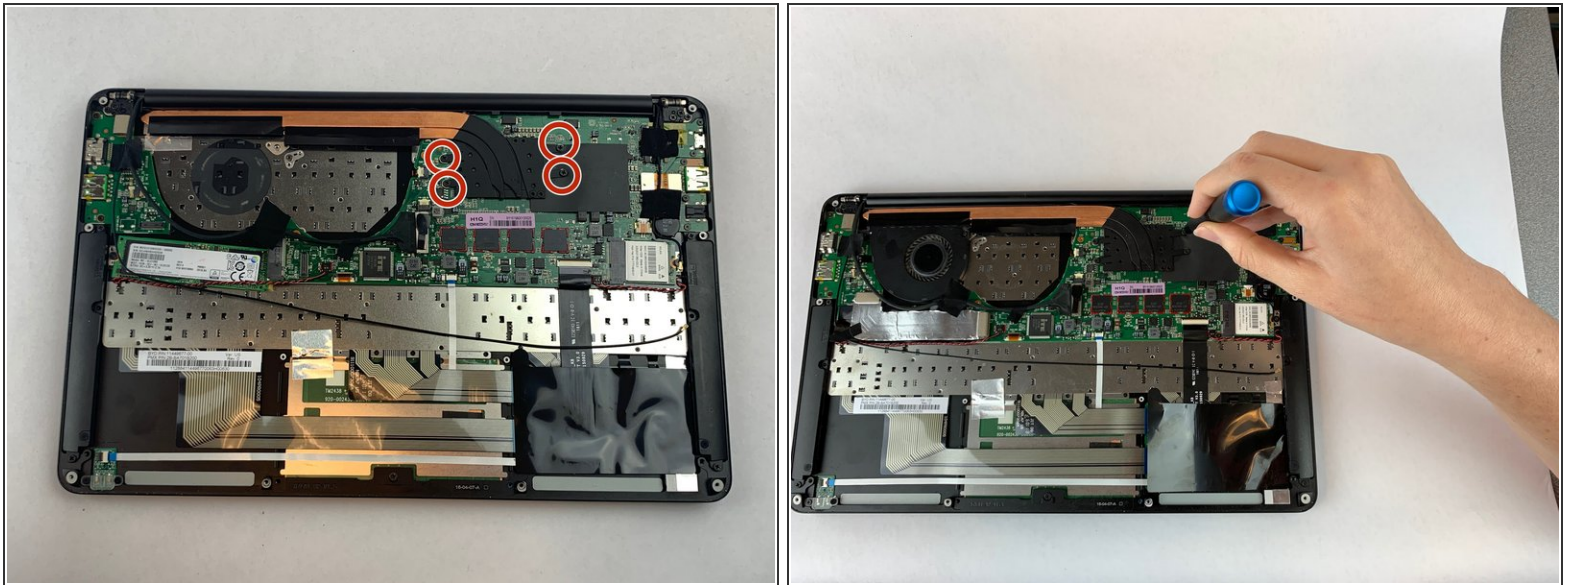

- Carefully lift and remove the left fan.

Step 6

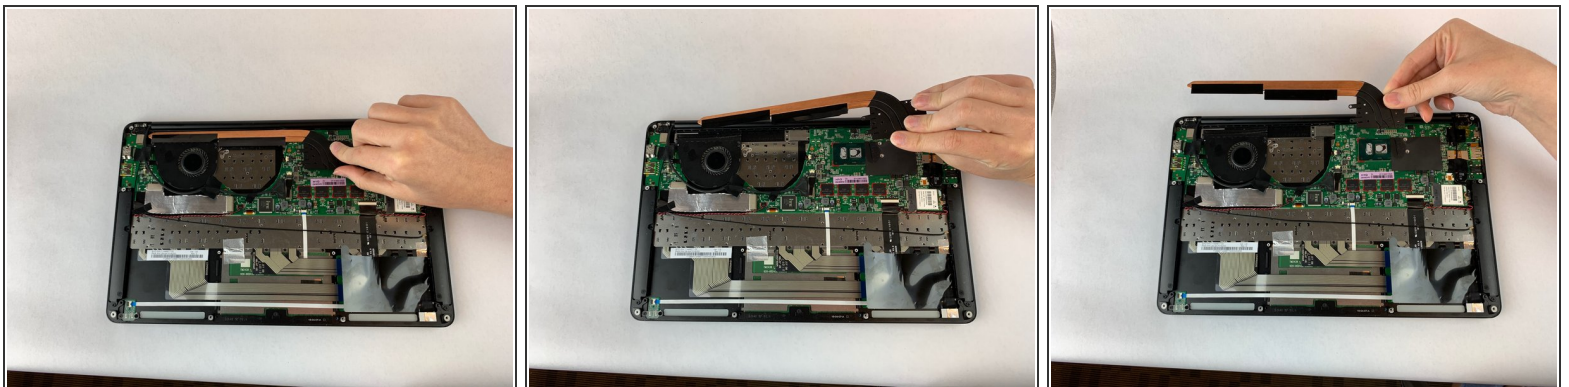

- Repeat steps five and six to remove the silver, right fan.

Step 7 — Heat Sink

- Remove the four 3.38 mm screws around the black square using a Phillips #00 screwdriver.

Step 8

- Once the screws are removed, the piece can be gently lifted from the back of the device.

To reassemble your device, follow these instructions in reverse order.
