

Removing Gum From My Little Pony Hair

How to remove gum from a My Little Pony mane.

Written By: Stacy Minnick

INTRODUCTION

I will demonstrate how to remove a wad of gum from a My Little Pony's mane. My Little Pony toys are very popular with little children who are learning to properly care for their toys. These figures can be expensive to replace so I will show how to remove gum or debris from its hair and restore it to the original look.

TOOLS:

- [Detangler](#) (1)
- [Rat Tail Comb](#) (1)
- [Wide Tooth Comb](#) (1)

PARTS:

- [My Little Pony](#) (1)

Step 1 — Removing Gum From My Little Pony Hair

- Prepare the My Little Pony and the tools that are required.

Step 2

- Douse the My Little Pony's mane with a detangler (any store brand will work).
- Massage the detangler into the mane around the gum.

Step 3

- Work the wad of gum out of the My Little Pony's hair with a rat tail comb small sections at a time.

Step 4

- Throw the wad of gum into the trash.

Step 5

- Comb the hair with a wide tooth comb until it is smooth and back to its original condition.

In conclusion, continue to work through the steps listed until all of the gum is removed and then your My Little Pony should be back to it's original condition.
