

# Repair Slipping Remote Control Scrollwheel

How to repair a slipping remote control scrollwheel with super glue.

Written By: Bert Meijer

 **TOOLS:**

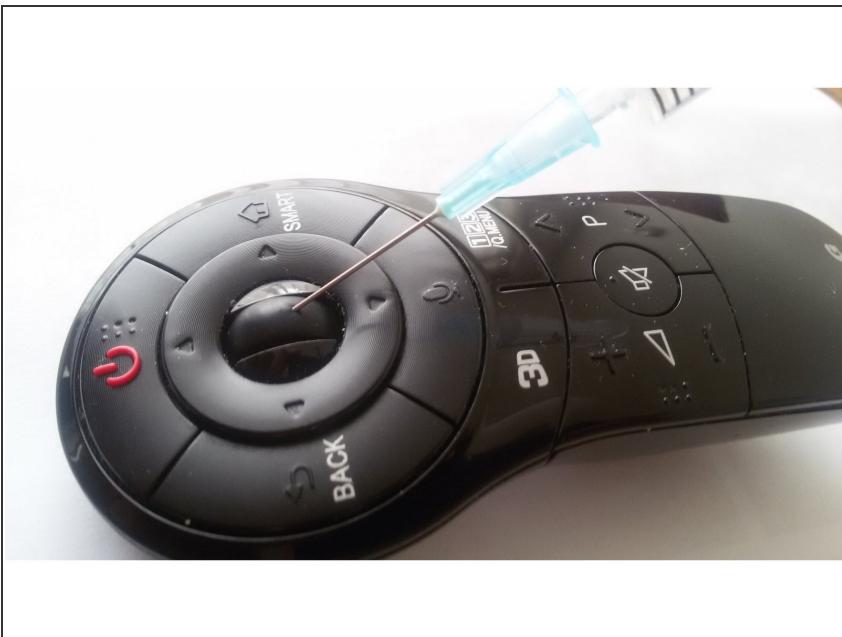

- [New Item \(1\)](#)

## Step 1 — Repair Slipping Remote Control Scrollwheel

- Suck a little bit of Superglue in an injection needle.

## Step 2

- Insert the needle into the rubber scrollwheel until you feel the rigid axle.

## Step 3

- Inject a small amount of glue onto the axle.

## Step 4

- Repeat the injection of glue on three different locations on the axle.

Leave the glue to cure for about ten minutes.
