Step 1 — Saw Casing

⚠️ Unplug the saw before attempting any of the replacement guides.

- Orient the saw so that the handle is closest to you and the saw end points towards the left.

Step 2

- Push down on the grey lock on the right side of the handle to unlock it.

- Pull the handle to detach it from the saw.

This document was generated on 2019-10-11 02:02:58 PM (MST).

Step 3

- Lift the black lock at the tip of the saw to unlock the depth gauge.

- Pull the depth gauge to detach it from the saw.

Step 4

- Rotate the device so that the bottom of the saw is facing upwards.

- Remove the six 20mm screws with a 6mm flathead screwdriver.

Step 5

- Cut through the stickers on the right and left sides of the saw using a metal spudger.

- Pull off the top half of the casing.

To reassemble your device, follow these instructions in reverse order.
