INTRODUCTION

This guide will help you replace the back cover of you controller. You'll only need a Phillips #000 screwdriver to complete this guide.

🔧 TOOLS:

- 54 Bit Driver Kit (1)
- Magnetic Project Mat (1)
- Phillips #000 Screwdriver (1)

Step 1 — Controller Back Cover

- Remove the screws on the back of the controller with the Phillips #000 screwdriver.

- Hold the controller with the bottom plate facing up, gently remove the top plate that is connected to the motherboard of the controller. Set the top plate aside.

⚠ Be sure to separate the two plates with the bottom facing up, to keep the buttons from falling out.

ⓘ Place screws on magnetic project mat to avoid losing any screws.

To reassemble your device, follow these instructions in reverse order.
