## INTRODUCTION

A guide on how to replace a damaged DC power board on a Samsung BD-7500.

### TOOLS:

- Phillips #1 Screwdriver (1)
- Phillips #0 Screwdriver (1)

## Step 1 — DC Power Board

- Remove the three 10mm screws with a Phillips #0 screwdriver.
- Pry the top off with a plastic opening tool.

## Step 2

- Remove the three screws holding down the cover with a Phillips #0 screwdriver.

## Step 3

- Lift up the power cord at its base to remove it.

## Step 4

- Insert a plastic opening tool into the black plastic tab on the cord and twist to separate.

## Step 5

- Remove the 7mm screw with a Phillips #1 screwdriver.
- Grip the blue tab attached to the base and pull upwards.

## Step 6

- Grip the edges of the motherboard and pull upwards to remove.

To reassemble your device, follow these instructions in reverse order.
