INTRODUCTION

Is your Blu-ray player not able to play your favorite flicks due to a faulty disc drive? If so, all you need is a #1 Phillips screwdriver and this guide to show how to replace the DVD disc tray with a new one.

TOOLS:

- [Phillips #1 Screwdriver \(1\)](#)

Step 1 — Top Cover

- Using a #1 Phillips head screwdriver, remove the three 10mm screws on the back panel.
- Tilt the back of the top cover forward to remove from chassis.

Step 2

- Gently pull up on the ribbon cable by the blue tab to remove it from the power supply board.

Step 3 — DVD Disc Tray

- Remove the two ribbon cables from the Main Logic Board assembly by gently pulling up on the blue tab.

⚠ Be careful not to damage the ribbon cable by using too much force.

Step 4

- Using a #1 Phillips head screwdriver, remove the two 7.5 mm screws (*one not shown*) near the front that secures the disc tray to the chassis.

Step 5

- Push two small prongs on either side of disc tray inwards and push disc tray forward.

Step 6

- Remove disc tray

To reassemble your device, follow these instructions in reverse order.
