

Samsung Blast Motherboard Replacement

This guide will demonstrate how to replace the motherboard of a Samsung Blast.

Written By: Paige Weinstein

INTRODUCTION

Use this guide to replace the motherboard of a Samsung Blast. This guide will take you through the process of how to successfully remove and replace the motherboard. A motherboard may need replacement if the device stops working.

TOOLS:

- [Phillips #00 Screwdriver](#) (1)
 - [Tweezers](#) (1)
 - [iFixit Opening Tools](#) (1)
-

Step 1 — Motherboard

- Remove the battery cover by pushing it upwards.

Step 2

- Take out the battery.

Step 3

- With a Phillips #00 screwdriver, remove the six screws that secure the back of the case.

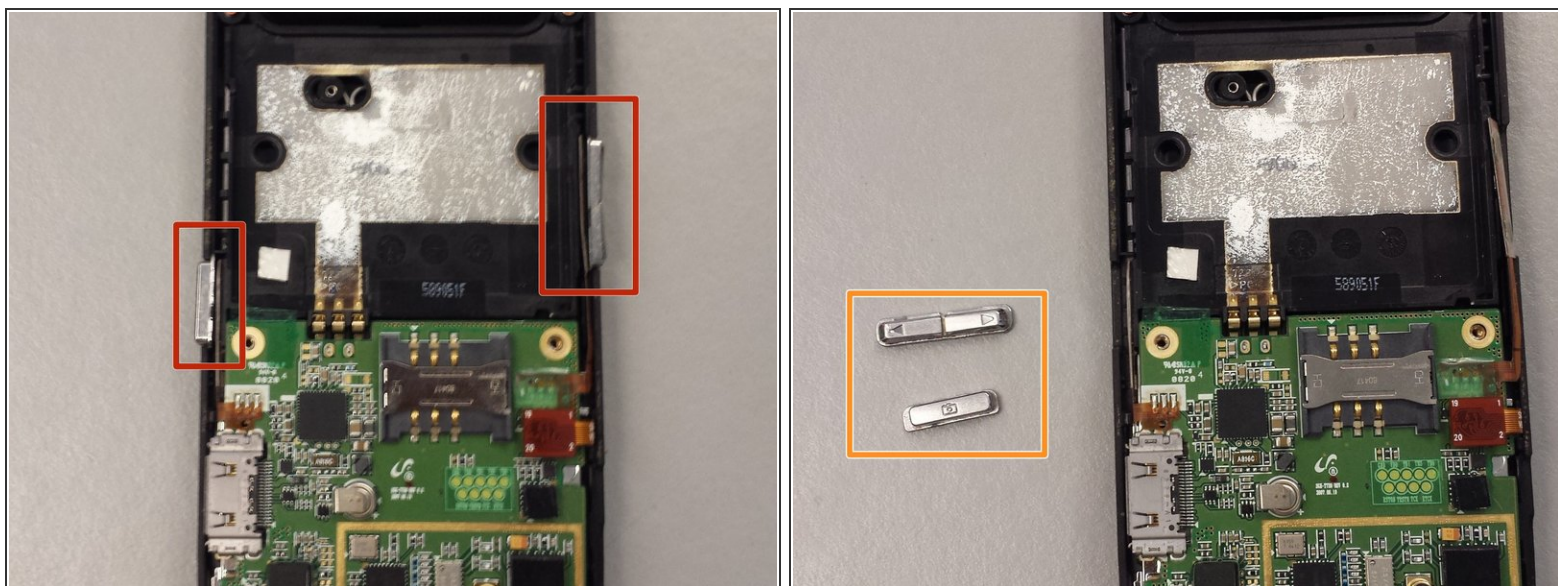

ⓘ You will not be able to completely remove the top two screws. Simply loosen them enough that you can still remove the cover.

Step 4

- Pull off the back cover of the phone.

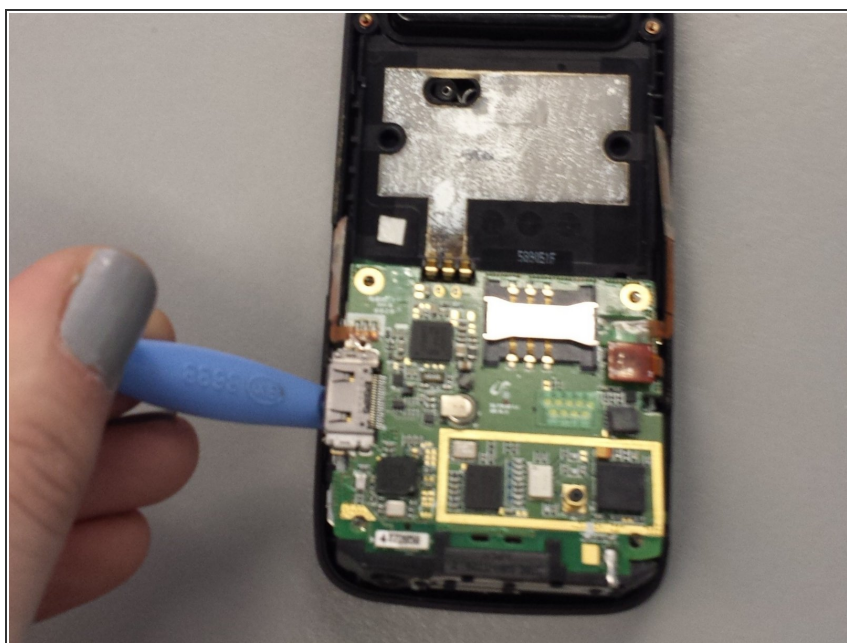

Step 5

- Remove the volume and camera buttons by pulling them out.

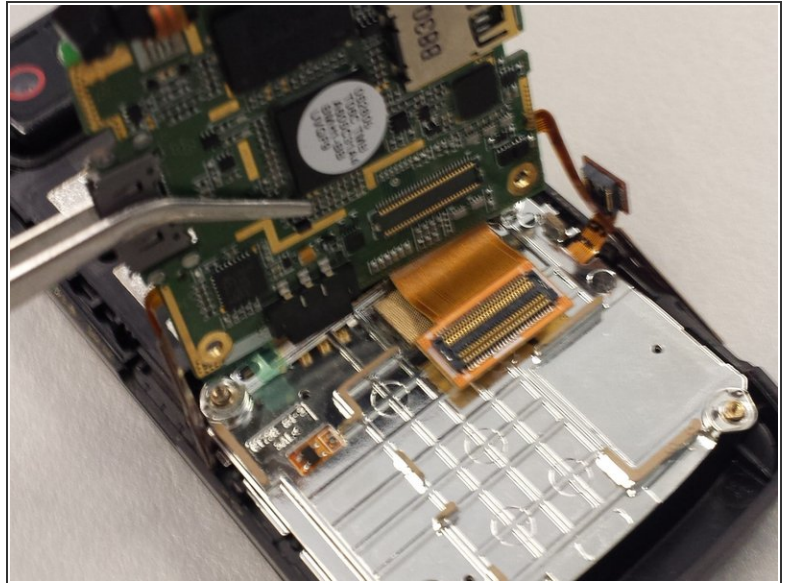

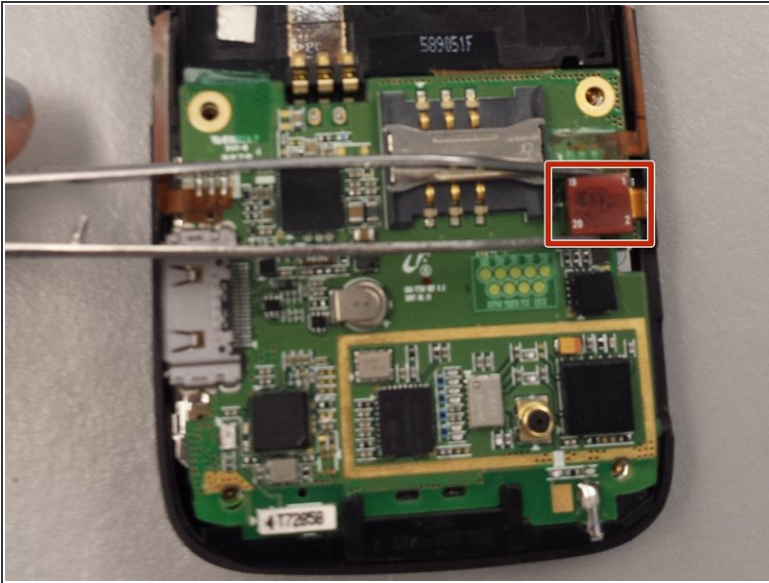

☑ Put the buttons aside until it is time to reassemble the phone.

Step 6

- Use the small plastic opening tool to gently remove the motherboard from the rest of the phone.

Step 7

- Gently grab the motherboard with tweezers, then disconnect it from the two attached plates.

To reassemble your device, follow these instructions in reverse order.
