

# Samsung Captivate Glide Motherboard Replacement

A guide on how to remove the motherboard of a Samsung Captivate Glide.

Written By: Nicholas Mira

## INTRODUCTION

How to remove the motherboard of a Samsung Captivate Glide.

### TOOLS:

- [iFixit Opening Tools](#) (1)
- [Phillips #00 Screwdriver](#) (1)
- [Tweezers](#) (1)

## Step 1 — Motherboard

- Remove back cover using fingernail or plastic opening tool. The cover pulls up and off.

## Step 2

- Remove battery with plastic opening tool or finger.

## Step 3

- Remove the seven screws from backplate using the #00 screwdriver.

## Step 4

- Remove the back plate using the plastic opening tool.
  - There is a lip on each side, and both must be pried up.
- You can work your way around the edges after prying the two sides.

## Step 5

- Use the plastic opening tool to detach the two tabs connecting the motherboard to the base of the phone.

## Step 6

- Disconnect the antenna cable from the motherboard using tweezers.

## Step 7

- Remove the single screw connecting the motherboard to the base of the phone by using the #00 Phillips screwdriver.

## Step 8

- Lift the motherboard out of the base of the phone.

To reassemble your device, follow these instructions in reverse order.
