### TOOLS:

- [Phillips #00 Screwdriver](#) (1)
  - [iFixit Opening Tools](#) (1)
  - [Phillips #000 Screwdriver](#) (1)
  - [Spudger](#) (1)
  - [Precision Tweezers Set](#) (1)
-

## Step 1 — Back Cover

 Turn the power off before beginning this step.

-  Most Chromebooks contain rubber circle pads on each of the four corners to cover the screws. In order to remove the rubber pads, simply use any opening tool.
- Lay the Chromebook down so that the bottom cover is facing upward.
- Using a Phillips #00 screwdriver, remove all seven 5.5 mm screws from the back cover.

## Step 2

- Place the opening tool in the divot between the spine of the Chromebook and the back cover.
- Slowly glide and push down the end of the opening tool along all sides of the Chromebook to detach the brackets. You will hear the brackets detach.

## Step 3

- Using the opening tool, pry off the back cover of the Chromebook

⚠ Be gentle while prying to avoid breaking the back cover.

## Step 4 — Battery

- Remove the four 3 mm screws using a Phillips #000 screwdriver.

## Step 5

- Carefully lift the top of the battery then pull it away from you to remove it.
- ❗ Some batteries may be attached via a battery connector. Disconnect the battery connector by simply pulling straight up at its base.

## Step 6 — SD Card Reader

- Remove both 3 mm screws using a Phillips #000 screwdriver.

## Step 7

- Remove the yellow tape on the left ribbon cable with a spudger.
- Use a blunt precision tweezer to remove both ribbon cables attached to the SD card reader.

## Step 8

- Gently lift the top portion of the SD card reader and pull it away from you to remove it.
- ☑ To reassemble, first insert the bottom of the SD card reader then carefully push downward.

To reassemble your device, follow these instructions in reverse order.
