## INTRODUCTION

You will need to find a clean area to work in and have the necessary tools. Follow this guide to gain access to your cellphone's camera module.

### TOOLS:

- [Phillips #00 Screwdriver](#) (1)
- [Spudger](#) (1)
- [Tweezers](#) (1)

## Step 1 — Back Case

- Remove the back battery cover.

## Step 2

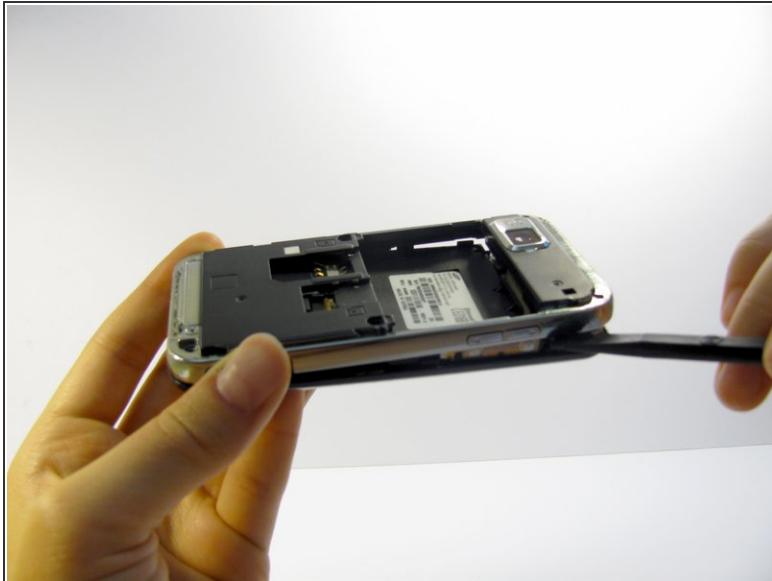

- Remove the phone's battery.

## Step 3

- Remove six (4.28 x 1.25)mm screws.

## Step 4

- Use the spudger to gently pry the silver plastic back plate from the body of the phone.

## Step 5 — Camera

- Peel off the Identification sticker.

## Step 6

- Peel the button sensor on the side of the motherboard off of the case.

## Step 7

- Pop the black hinged-release lever toward its ribbon, then slide the ribbon out.

## Step 8

- Peel up the camera attachment.

## Step 9

- You will now be able to replace the Camera component with a new part.

To reassemble your device, follow these instructions in reverse order.
