TOOLS:

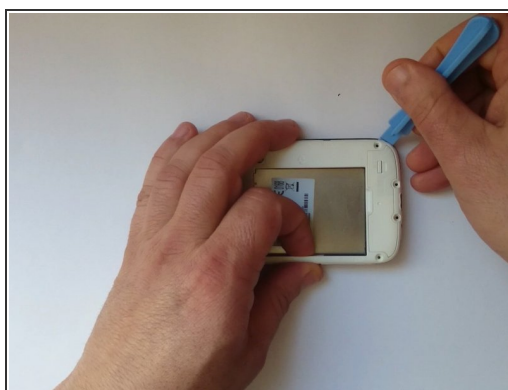

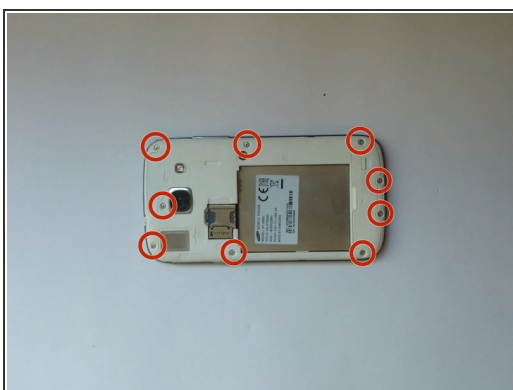

- [Phillips #0 Screwdriver](#) (1)
 - [iFixit Opening Tools](#) (1)
-

Step 1 — Vibra Motor

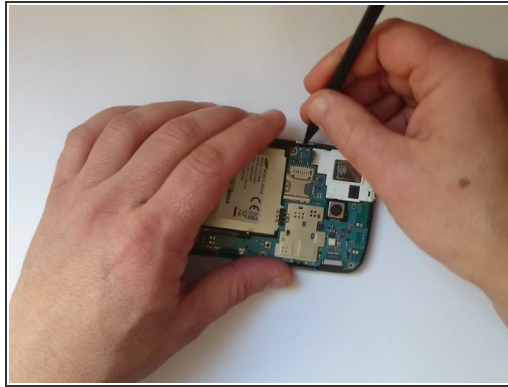

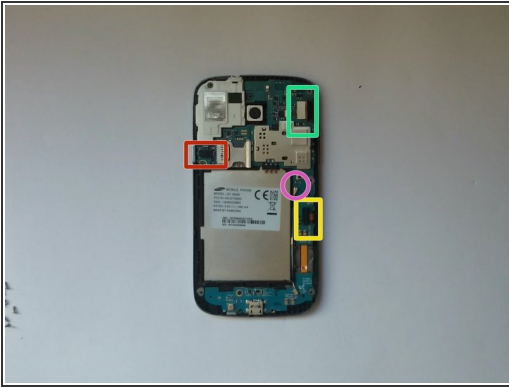

- Switch-off the phone.
- Remove the Battery cover and the battery.
- Remove an inserted SIM and Memory cards.

Step 2

- Remove 9x Phillips screws.
- With a plastic tool remove the Back cover.
- The Vibrator is on the other side of the back cover

Step 3 — Logic Board

- Disconnect one by one:
 - Earpiece/Loudspeaker/Audio Jack connector module flex cable
 - LCD Display flex cable
 - Charging Dock/Antenna/Mic module flex cable
 - Coaxial Antenna cable
- Carefully remove the Logic Board.

Step 4 — Main and Front Cameras

- Main / Rear Camera
- Front Camera
- With a plastic tool open the Camera flex cable connector.
- Carefully remove the camera.

To reassemble your device, follow these instructions in reverse order.
