INTRODUCTION

This guide is a continuation of the band replacement guide. It is for showing how to replace the camera.

TOOLS:

- [T5 Torx Screwdriver \(1\)](#)
- [iFixit Opening Tools \(1\)](#)

PARTS:

- [Galaxy Gear \(1st Gen\) Camera \(1\)](#)

Step 1 — Band

- Loosen the camera ribbon so it will easily pass through the watch body.

Step 2

- Grip the body of the watch and pull the band upward.
- Do the same with the adjacent band, but there will be no camera ribbon to pass through the watch body.

Step 3 — Camera

- Use the plastic opening tool to pry the camera backdoor.
- Use the plastic opening tool to pry the tab and pull the camera.

To reassemble your device, follow these instructions in reverse order.
