

Samsung Galaxy J7 v Volume Button Replacement

In this guide you will learn how to replace a faulty volume button on the Samsung Galaxy J7 v

Written By: Somtoo Chukwurah

TOOLS:

- [Metal Spudger](#) (1)
 - [Jimmy](#) (1)
 - [Phillips #000 Screwdriver](#) (1)
-

Step 1 — Screen

- Begin by using the Jimmy tool to get underneath the screen.

Step 2

- Gently slide the Jimmy tool around the entire perimeter of the phone.
- ⓘ For an easier removal of the screen, it is recommended to use a heat gun prior to completing this step in order to warm up the adhesive.

Step 3

- Carefully lift up the screen and remove it.

Step 4 — Home button

- Locate the socket of the home button. Get metal spudger to fit in between the socket.

Step 5

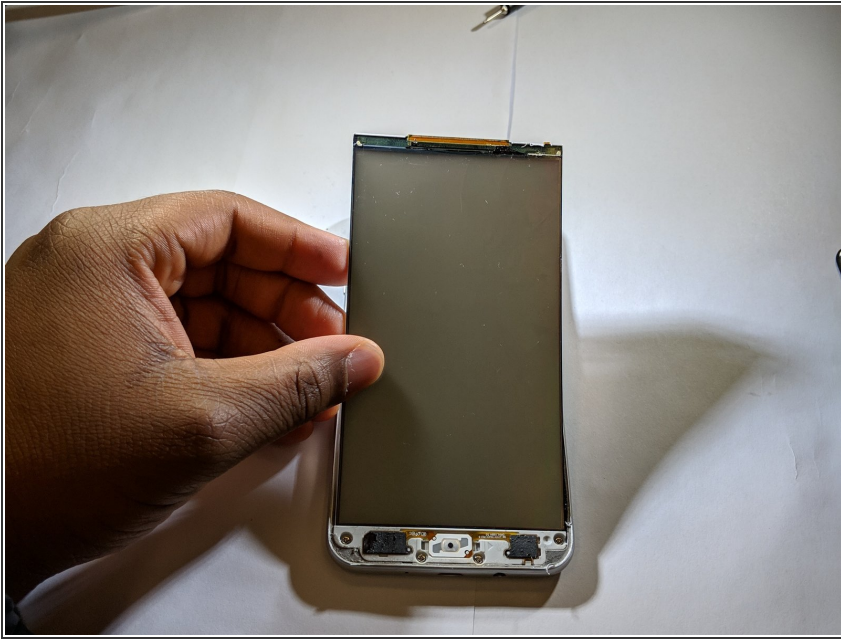

- Take metal spudger and slide it underneath the home button and lift up until the home button is removed from its socket.

Step 6 — Volume Button

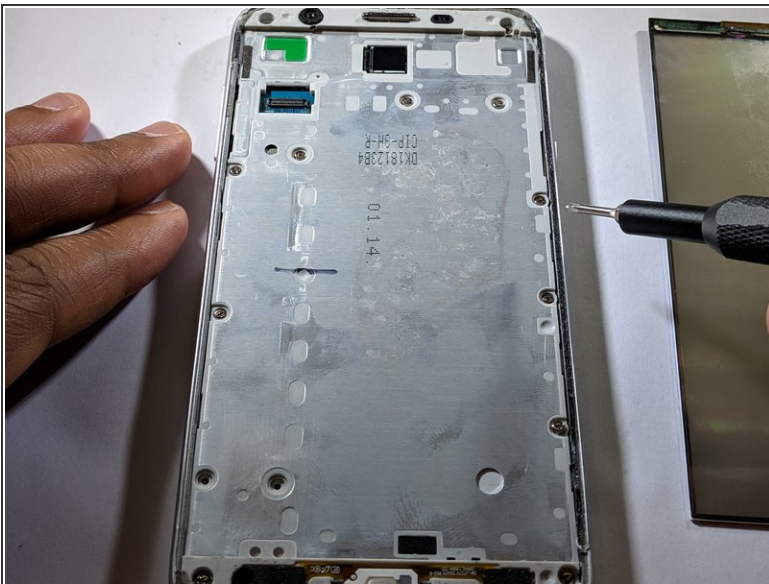

- Remove screws around home button and screws above

Step 7

- Pull off screen from panel.

Step 8

- Remove all adjacent screws

Step 9

- Pop of panel from plastic hold

Step 10

- Use tool to push down button hold then volume button can be removed by pushing it down

To reassemble your device, follow these instructions in reverse order.
