INTRODUCTION

The guide will show the process of safely changing the battery of your device.

TOOLS:

- iFixit Opening Tools (1)

This document was generated on 2019-09-18 12:41:18 AM (MST).

Step 1 — Battery

- Before starting, ensure device is completely turned off.

- On the back of phone, locate the slot on the top left corner.

- Insert plastic opening tool or fingernail and pull up on the back plate.

- With the corner released, slide your finger around the device between the back plate and the phone to release connectors.

Step 2

- Insert fingernail into the slot on bottom of battery and gently pull up.

- Remove the battery.

To reassemble your device, follow these instructions in reverse order.
