# INTRODUCTION

If you found this useful don't forget to give it a like

## TOOLS:

- [Phillips #0 Screwdriver](#) (1)
  - [Spudger](#) (1)
-

## Step 1 — Samsung Galaxy Note 3 Water Damage Corrosion Repair Disassembly

- First , Take the phone cover off and the battery and Sim Card ( If you have one )

## Step 2

- Once you have taken the battery and cover off you can see 12 screws in the phone . Use the Phillips 0 Screwdriver to get the screws out of the phone .
- ☑ Put the screws safe in something like a small cup

## Step 3

- Pull out the S Pen and use a spudger or a screwdriver to pull the 2nd cover off by the S Pen slot .

## Step 4

⚠ Be Careful !!! Take a look of the circuit board . It has 7 connections that you need to disconnect for the circuit board to be free .

ⓘ Sorry it won't let me show the whole picture for some reason .

## Step 5

- Once you disconnected all 7 connections Take the circuit board out of the phone

To reassemble your device, follow these instructions in reverse order.
