

Samsung Galaxy Note Battery Replacement

This guide shows you how to install a new battery in your Samsung Galaxy Note LTE.

Written By: Anastasiya Kirichuk

INTRODUCTION

Make sure you have turned off your phone before starting. A newly purchased phone includes a rechargeable Samsung battery. Check out the device's [troubleshooting page](#) before changing the battery.

You may want to replace the battery if the battery can not hold charge, won't charge, or your phone does not turn on after a hard reset.

TOOLS:

- [Phillips #00 Screwdriver](#) (1)
 - [Spudger](#) (1)
-

Step 1 — Battery

- Make sure the screen is face-down and the camera is opposite you.
- Insert the flat end of a spudger into the phone's top right rectangular slot.
- Use the spudger as a lever to pry open the back of the phone.

Step 2

- With the spudger still inserted, carefully slide the spudger down the side of the phone.
- Gently peel off the back cover with your hand.

Step 3

- Place the spudger in the battery's bottom right slot.
- Gently pry to remove the battery.

To reassemble your device, follow these instructions in reverse order.
