## INTRODUCTION

Replacing the microphone of your Samsung Galaxy Note Pro 12.2 (Galaxy SM-P900) is a great idea for refurbishing this device.

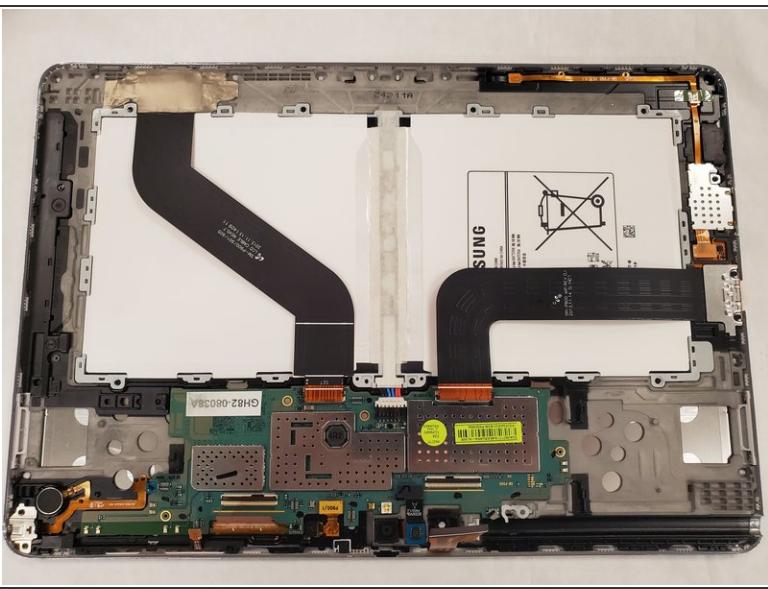

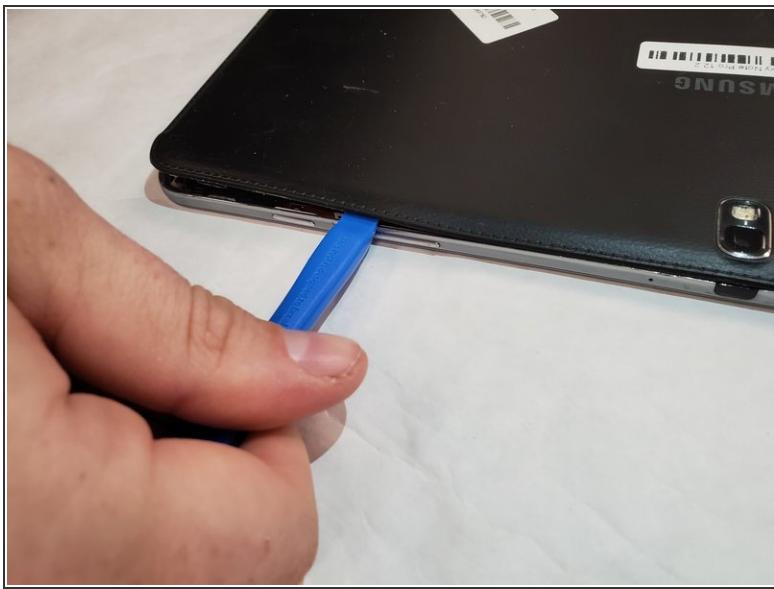

Location and removal of this component within the tablet device is not easily done. Steps 1-3 will walk you through the removal of those components.

Lastly, be sure that your device is powered off before beginning the disassembly process.

### TOOLS:

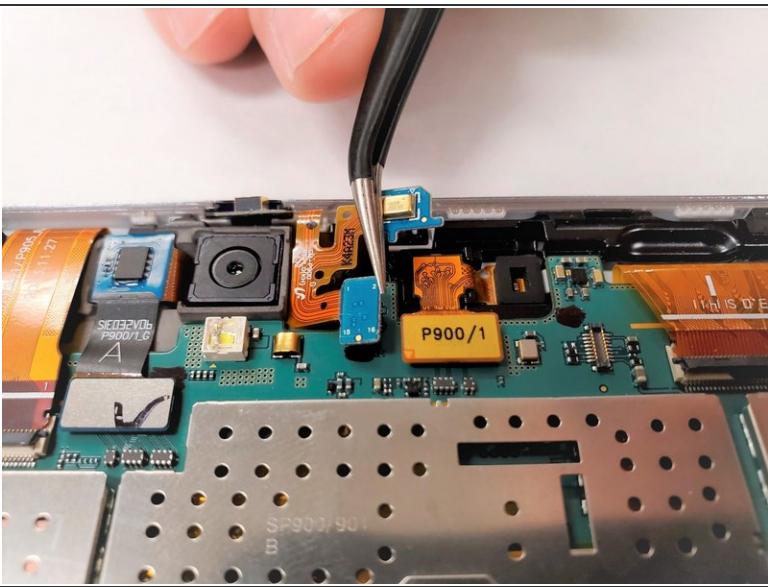

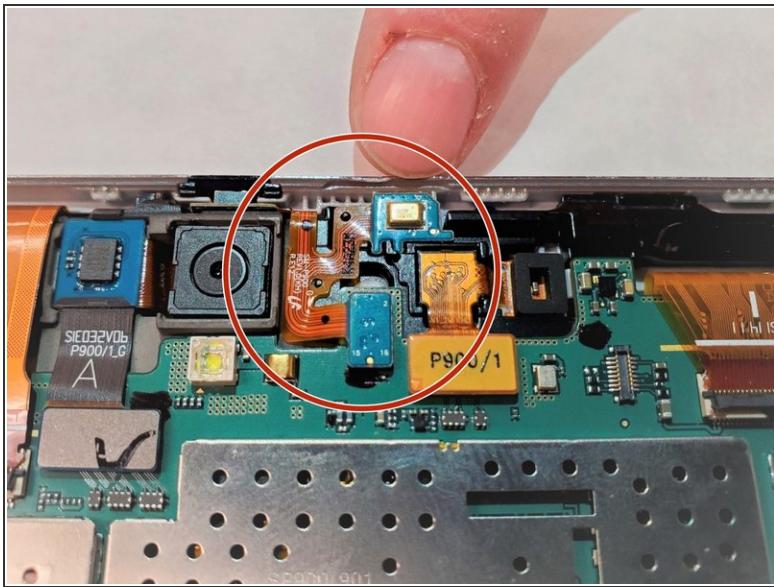

- [iFixit Opening Tools](#) (1)
- [Tweezers](#) (1)

## Step 1 — Microphone

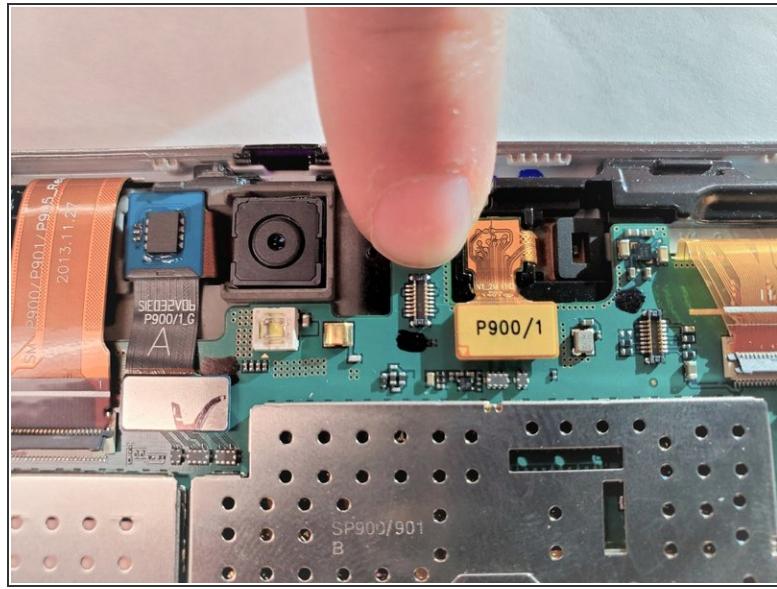

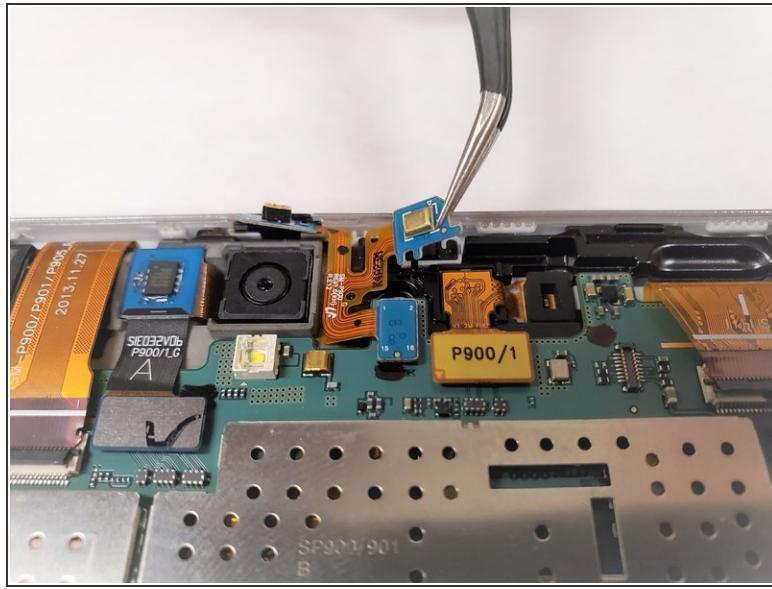

- Remove the black back cover with a blue iFixit opening tools by working it around the perimeter of the case.

## Step 2

- Identify the microphone first; it is a small component. The location is adjacent to the rear camera.
- Remove the microphone by using the angled tweezers tool, starting at the base of the component to free it from the motherboard.

## Step 3

*(i)* The ambient light sensor is attached to the microphone. They come out together in one piece.

- Remove the entirety of the microphone with the tweezers.

To reassemble your device, follow these instructions in reverse order.
