INTRODUCTION

I am teaching how to take apart a Samsung Galaxy S III.

TOOLS:

- [Essential Electronics Toolkit](#) (1)
-

Step 1 — Take back off

- You simply take the back of the phone cover off and you will be able to see the user serviceable battery.

Step 2 — Remove battery and screws

- Simply remove the user serviceable battery and screw out the screws to take off the first plastic assembly.

Step 3 — Remove second top plastic assembly

- Undo the screws in the second plastic assembly and remove.

Step 4 — Remove motherboard and camera

- Take out one extra screw and dis-tact the motherboard from the phone and take out the lens as well.
