INTRODUCTION

This guide will provide step-by-step instructions on how to replace the battery of your Samsung Galaxy Tab 4 7.0. After replacing your tablet battery, it would be wise to recycle the battery at a local battery store or electronics retail center.

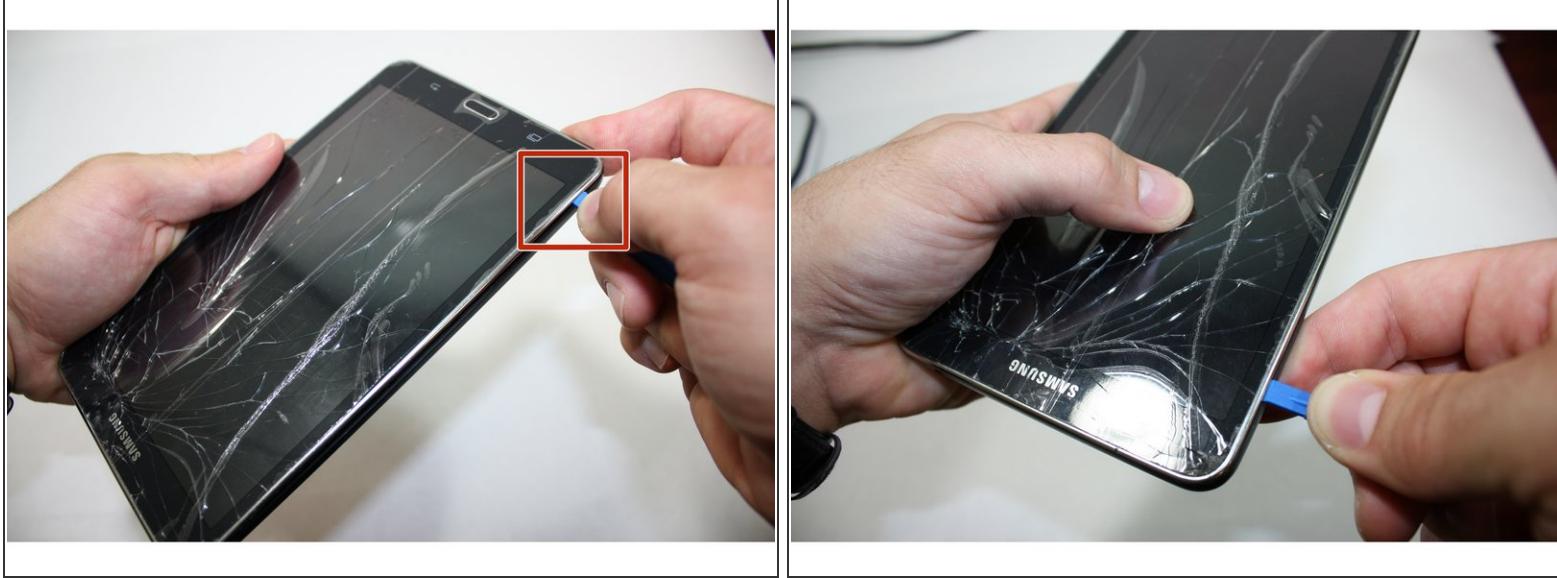

TOOLS:

- Tweezers (1)
- iFixit Opening Tools (1)
- Metal Spudger (1)

PARTS:

- [Samsung Galaxy Tab 4 7.0 Battery](#) (1)

Step 1 — Back Panel

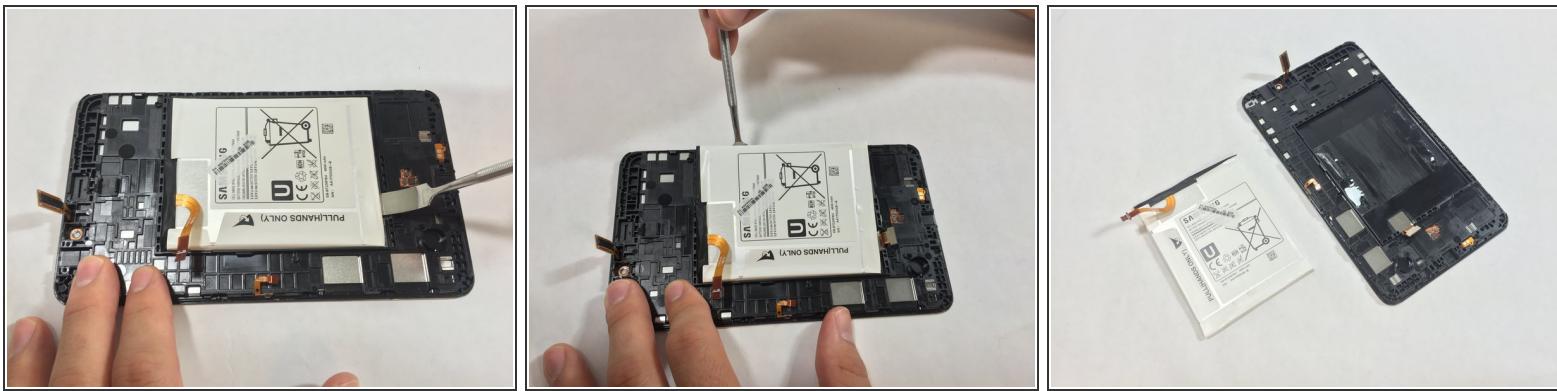

- Starting at any corner, insert the pry tool between the chrome screen frame and black phone housing.
- Slide the pry tool around the tablet while applying force to pry the screen away from the phone housing.

Step 2

- Carefully separate the rear housing from the front panel assembly.

Step 3 — Battery

- ⓘ You do not need to remove the motherboard in order to remove the battery as the photos may indicate.
- Work the spudger underneath the battery as shown and pry the battery away from the phone case.
- ⓘ The battery is attached to the case with adhesive, so a bit of force is required during removal.

To reassemble your device, follow these instructions in reverse order.
