INTRODUCTION

If your back cover is cracked or damaged, use this guide to replace it. This step will damage the water resistant seal. Be persistent, as a lot of time and force will be needed to break the adhesive.

TOOLS:

- Metal Spudger (1)
- Tri-point Y00 Screwdriver (1)

Step 1 — Back Cover

- Place the watch screen-down so that its back cover is showing.

Step 2

- Remove the four 4.2mm screws with a Y00 screwdriver.

| |

Step 3

- Wedge the metal spudger in between the back cover and the frame along the seam.

- Use force to pry the back cover away from the main watch frame.

- (i) This step requires a lot of force. You can use a Jimmy in place of a metal spudger to make the process easier.

- ⚠ This step will ruin the water-proof seal.

To reassemble your device, follow these instructions in reverse order.
