

Samsung ML2510 Side Cooling Fan Replacement

This guide will teach you how to replace the side cooling fan on the Samsung ML2510

Written By: bbaustin

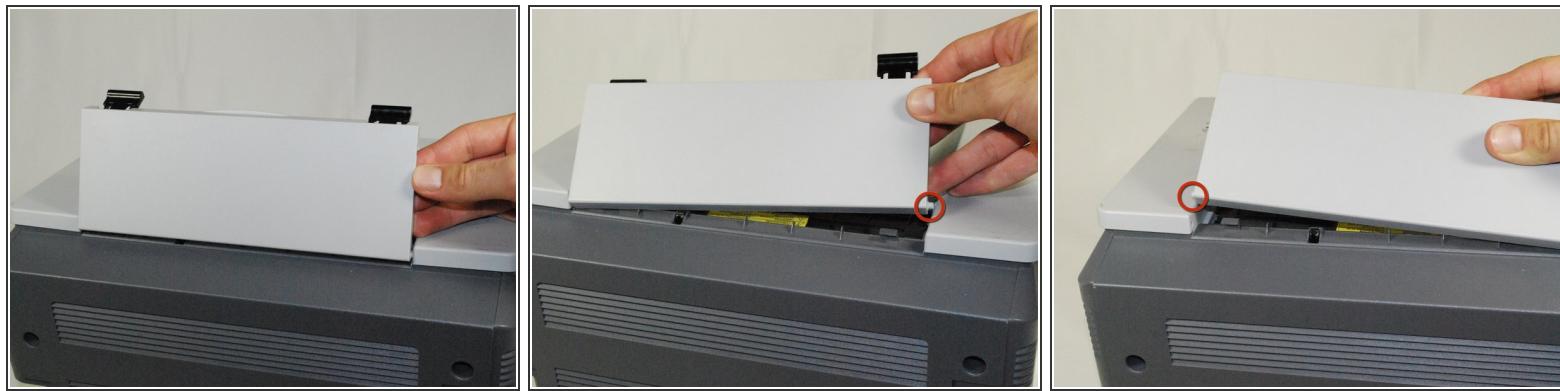

INTRODUCTION

This guide will require you to disassemble the back and side panel of the printer. You will need to refer to the [Removing Samsung ML2510 Back Panel](#) guide in order to complete the task.

TOOLS:

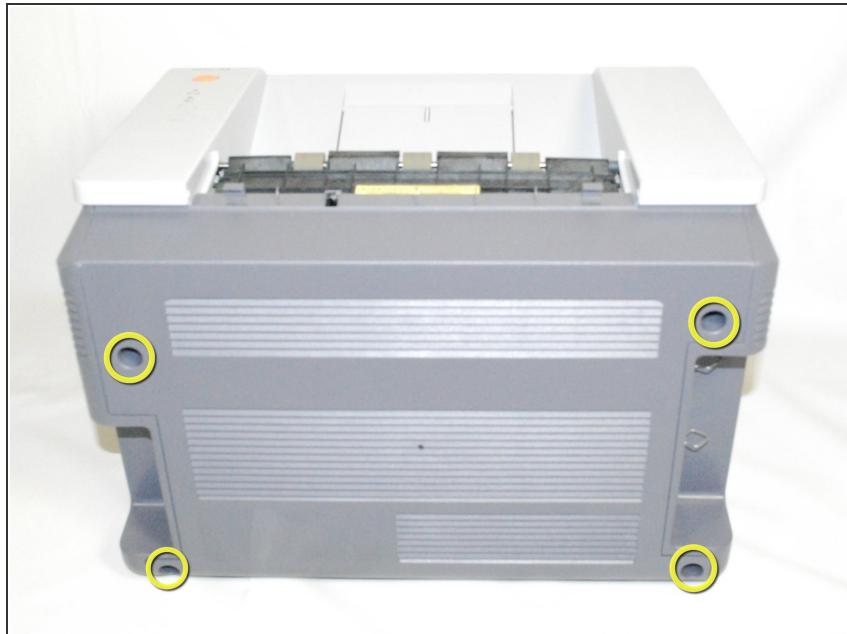

- [Phillips #2 Screwdriver](#) (1)
- [iFixit Opening Tools](#) (1)

Step 1 — Removing Samsung ML2510 Back Panel

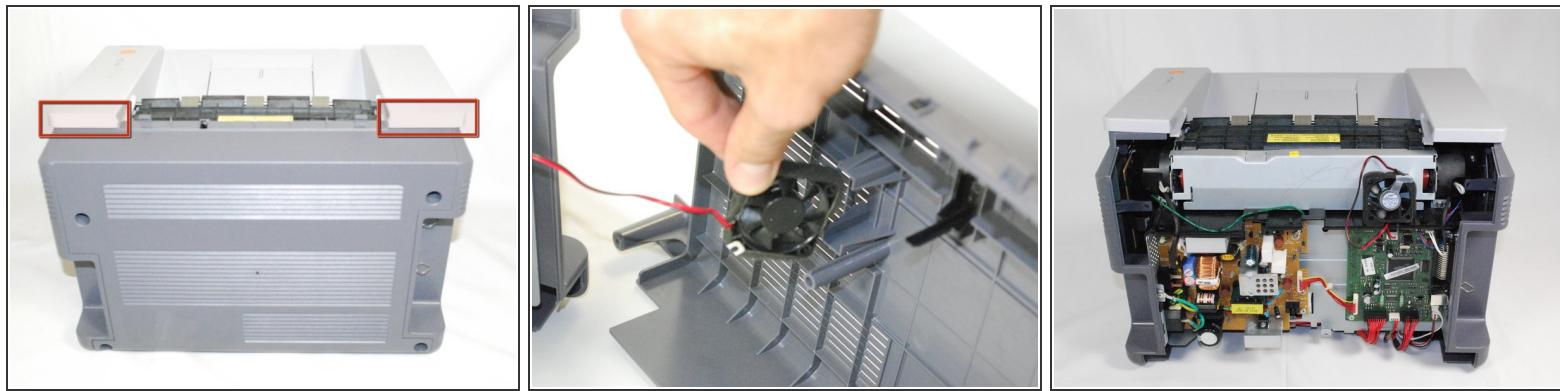

- Remove the hinged top panel by taking the small pins at the bottom of the panel out of their holes.

Step 2

- Using a Phillips #2 screwdriver, remove the four 1" long, Phillips, PH#2 screws on the back of the printer.

Step 3

- Gently lift the top panel while simultaneously pulling off the back panel.

 Before pulling out the back panel entirely, make sure to remove the rear cooling fan from its slot.

Step 4 — Side Cooling Fan

- Locate the holes on the panel that are attached to the main body.
- Remove the front panel by gently moving the holes from the pegs one by one.

Step 5

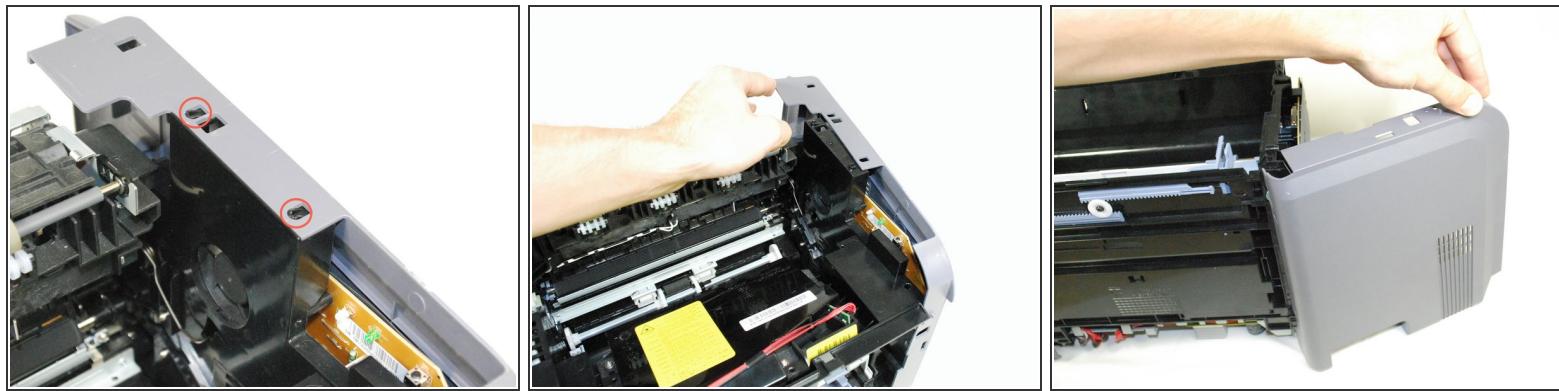

- Using a Phillips #2 screwdriver, remove the two 1" screws on the front face of the printer.

Step 6

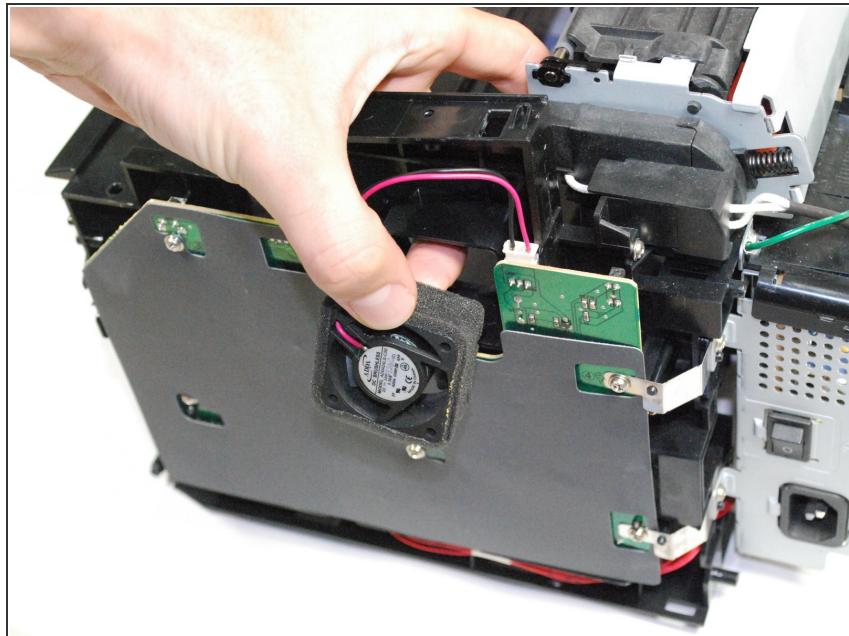

- Using a plastic opening tool, gently lift one side of the top panel from its peg.
- Repeat process for the other side.
- Lift the top panel from the front to remove it entirely.

Step 7

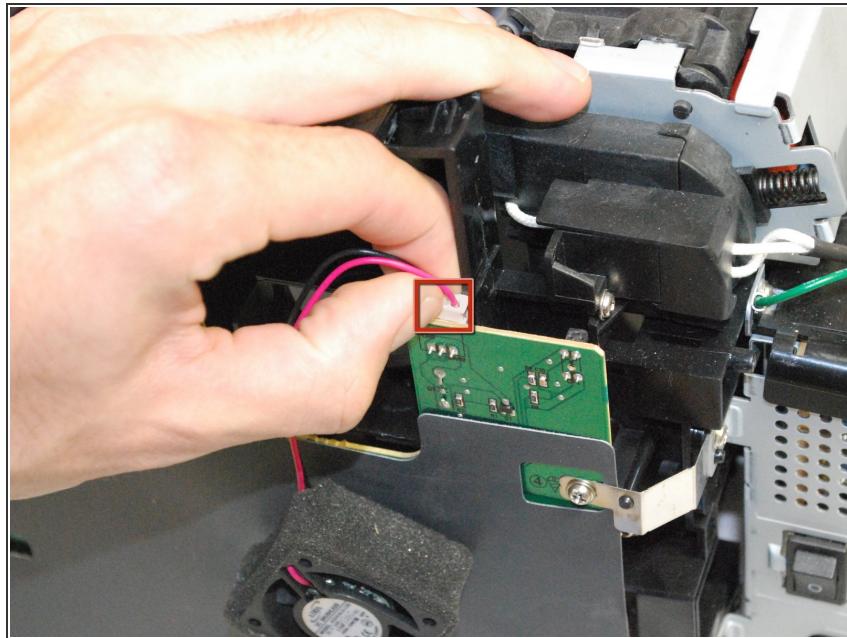

- Lift the right side-panel up from the raised stops.
- Gently rotate the panel as indicated in the picture to remove the panel entirely.

Step 8

- From the inside of the printer, poke out the side fan.

Step 9

- Unplug the fan's wires from the side circuit board.
- Replace the fan and reassemble the printer using reverse procedures.

To reassemble your device, follow these instructions in reverse order.
