

Samsung NP305E5A-A03US Battery Replacement

This guide will help you through the process of replacing a faulty battery.

Written By: Kris Stobbe

INTRODUCTION

This guide will help you replace your faulty battery. You may want to use this guide if your computer [does not power on.](#)

Step 1 — Battery

(i) Be sure to power down your laptop before replacing your battery.

- Turn your laptop upside down so that the battery component is facing you.

Step 2

- Place your thumbs on the lock tabs.

- Slide the tabs with your thumbs in an outward direction (in the direction of the arrows).

(i) You should hear a click when you properly slide the tabs all the way.

Step 3

- Pull the battery out of the laptop towards yourself to safely remove the battery.

⚠ If you are discarding the battery, please do not throw it away in the trash. Instead find a local battery recycling facility that will not damage the environment.

To reassemble your device, follow these instructions in reverse order.
