INTRODUCTION

The CD drive is a major component in this laptop. Users will be shown how to replace the CD drive in this guide.

TOOLS:

- [Phillips #0 Screwdriver \(1\)](#)

Step 1 — Battery

- Turn the computer off.
- Disconnect the charging cable from the laptop.

⚠ Failure to disconnect cable may result in electric shock.

- Flip the laptop face down on a flat surface.

Step 2

- Slide the left and right switches to the unlock position.

Step 3

- While holding the left and right lock switches in the unlock position, pull the battery away from the computer.

Step 4 — ODD/HDD/Memory panel

- Locate the ODD/HDD/Memory panel.
- Remove the 1.9 mm screw located on the ODD/HDD/Memory panel with the Philips #0 screwdriver.
- Slide the ODD/HDD/Memory panel away from the device to remove it.

Step 5 — CD Drive

- Locate the screw on the right side of the SSD port.
- Remove the 2.25 mm screw located on the right side of the SSD port with the Philips #0 screwdriver.

Step 6

- Locate the CD drive and slide the drive out of the computer.

To reassemble your device, follow these instructions in reverse order.
