INTRODUCTION

This guide will give a step by step walk through on how to remove the back panel of the laptop. Before replacing the back cover make sure the device is unplugged and turned off as a safety step.

🔧 TOOLS:

- Phillips #0 Screwdriver (1)

Step 1 — Back Panel

- First turn the computer over so you are looking at the back panel.

- Next locate all ten Phillips #0 3.5mm screws on the back panel that are securing it down.

Step 2

- Next remove all 3.5mm Phillips #0 screws shown in the previous step.

Step 3
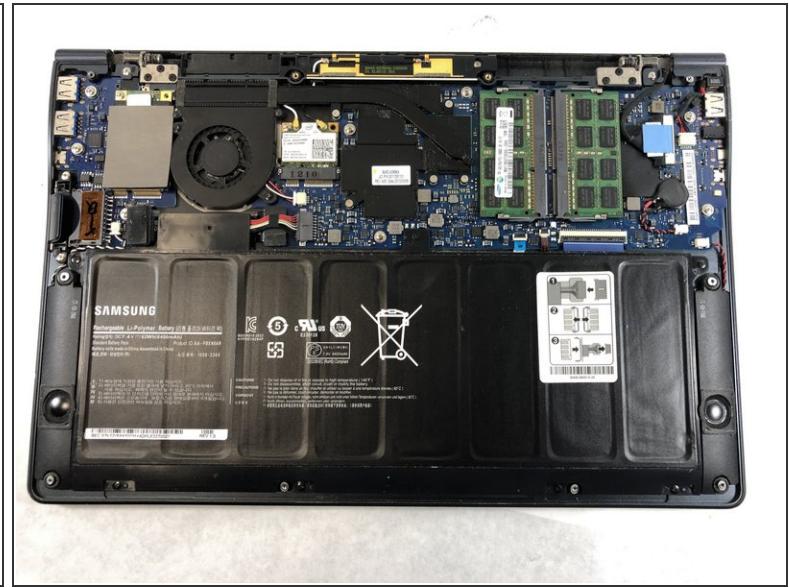

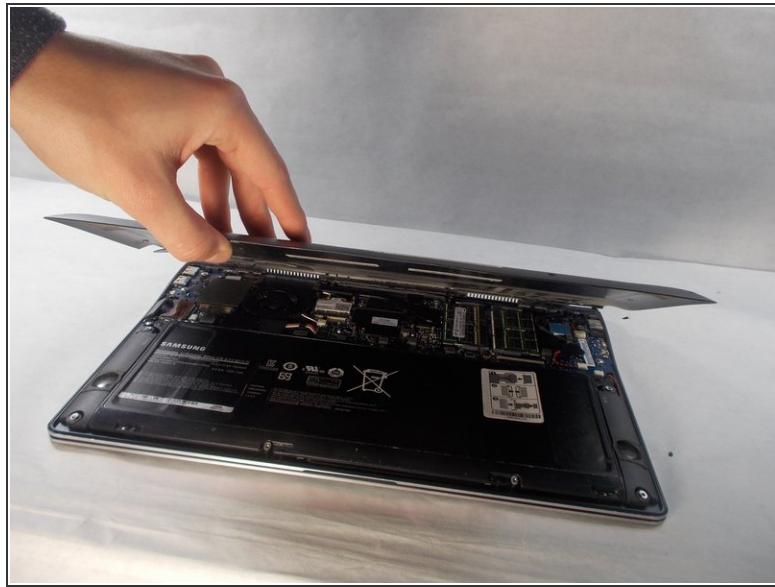

- After all screws are removed, lift up the back panel as shown.

To reassemble your device, follow these instructions in reverse order.
