

Samsung POWERbot VR9000 Powerbrush Replacement

Removing the powerbrush from the bottom of the POWERbot for replacement or cleaning.

Written By: Harrison Fugate

INTRODUCTION

This guide will teach you how to access and replace/clean the powerbrush of your POWERbot. This can be done to make your POWERbot clean more efficiently.

Step 1 — Powerbrush

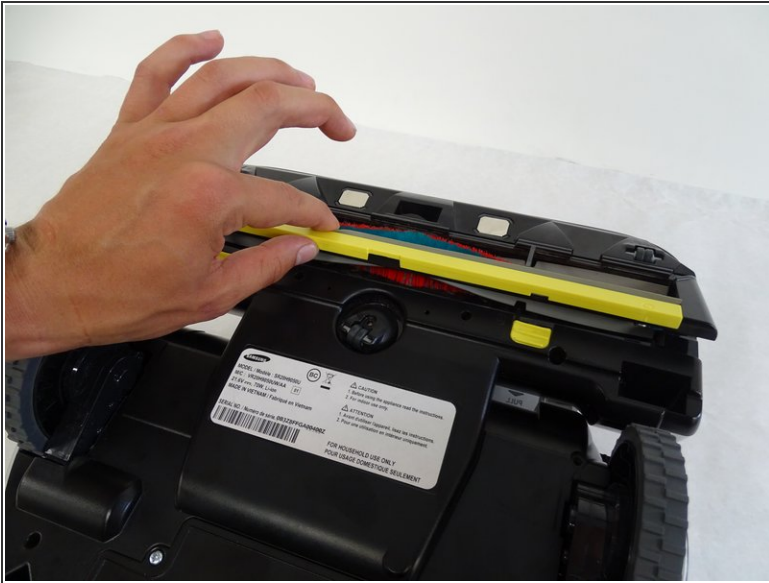

- Turn off the emergency switch located at the bottom right of the POWERbot.

Step 2

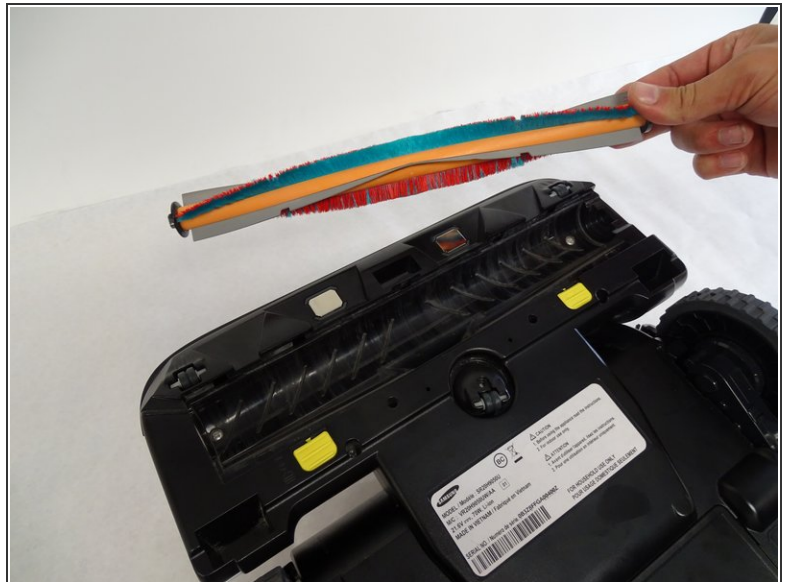

- Press the two yellow tabs immediately below the POWERbrush.

Step 3

- Lift the brush cover, indicated by the yellow strip located above the yellow tabs.

Step 4

- Remove the power brush starting with the unhinged right side of the brush.

To reassemble your device, follow these instructions in reverse order.
