

# Samsung RC512 Screen Replacement

This guide provides a simple walkthrough for repairing a damaged LCD screen on a Samsung RC512.

Written By: Juri Ando

## INTRODUCTION

Screen replacement may need to be done when the screen is damaged, such as lines on the screen and not showing anything. Refer to the [Troubleshooting page](#) to see more information about this. This guide will display the steps needed to replace a damaged screen on Samsung RC512.

### TOOLS:

- [Tweezers](#) (1)
- [Phillips #0 Screwdriver](#) (1)
- [iFixit Opening Tools](#) (1)

## Step 1 — Battery

- Place the laptop upside down.

## Step 2

- Locate two notches above the battery.
- Slide both battery locking notches to either side to remove the battery.
- Pull the battery out.

## Step 3 — Screen

 The Laptop should be off before removing the battery.

- Slide both battery locking notches to either side to remove the battery.
- Pull the battery out.

## Step 4

- Remove the gray covers with tweezers to expose the 4mm screws.
- Using a Phillips #0 screwdriver, remove the four 4 mm Phillips #0 screws.

## Step 5

- Insert the blue plastic opening tool into the bezel and rear housing of the screen.
- Use the plastic opening tool to pop open the claps that hold the casing on the screen.
- Work your way around the sides carefully and continue this to the bottom.

***(i)*** You may use your fingers to help remove the cover.

## Step 6

- With the Phillips #0 screwdriver remove the six 3 mm screws, which mount the screen onto the base of the laptop.

**⚠** As you remove the last two screws, support the screen. As the screws are taken out, the screen will begin to fall forward.

## Step 7

- Gently lay the LCD onto the keyboard.
- ⚠ Do not separate the LCD screen and the back panel from each other. The video connector still connects the two together.
- Remove the tape that secures the video connector to the LCD screen with tweezers.
- Grasp the video connector at its base and pull it away from the LCD screen.
- ⓘ The only thing holding the screen will be the clear tape causing it to come out easily.

To reassemble your device, follow these instructions in reverse order.
