

# Samsung SGH-T639 Water Damage Indicator

This guide will give instructions for identifying water damage to the Samsung SGH-T639.

Written By: Yi Ren

## INTRODUCTION

This guide contains photos that do not include pictures of the back cover or battery. However, the instructions have been adjusted to reflect this lack of visual aid.

## Step 1 — Battery

- Flip the phone over and take off the back cover

*i* Note: These images do not contain the back cover or battery of the phone.

## Step 2

- Use button to remove battery from the phone.

*i* Note: These images do not contain the back cover or battery of the phone.

## Step 3 — Samsung SGH-T639 Water Damage Indicator

- Locate the white square on the back of the phone.
- If the square is solid white, the phone has not received any water damage.

## Step 4

- Locate the white square on the back of the phone.
- If the square is red at all, the phone has been exposed to water damage.

To reassemble your device, follow these instructions in reverse order.
