

# Samsung SPH-M360 Keyboard Replacement

This guide will show the user how to replace the keyboard on the Samsung SPH-M360

Written By: Hunter Parker

## INTRODUCTION

This guide will require no more than a finger.

### TOOLS:

- [Phillips #0 Screwdriver \(1\)](#)
- [iFixit Opening Tools \(1\)](#)

## Step 1 — Battery

- Locate the arrow on the panel of the rear side of the phone.
- Use one or two fingers to apply light pressure downwards on the rear panel and push or pull in the direction of the arrow.

## Step 2

- Place finger inside the small semi-spherical slot near the top of the battery.
- Lightly pull the battery away from the phone. This should not require much effort.

## Step 3 — Casing

- Remove the four screws on the corners of the casing.

**⚠** The volume and camera buttons may fall out

## Step 4

- Starting near the top of the casing, use the plastic opening tool to gently pry the casing open.
- *(i)* The case should require some effort to pry open, but do not use excessive force for risk of breaking the rear panel.
- Slowly work the plastic opening tool around the edge of the casing, gently prying it around at all sides.

## Step 5

- Once the casing has been fully pried off of the phone, it should be easily removed by hand.
- ⚠** The buttons for the camera and volume may fall out while removing the casing. Be careful not to lose the small pieces.

## Step 6 — Keyboard

- Flip open the phone so that the text on the keyboard is visible.
- Push from the text side until the keyboard comes completely out of the phone casing.

To reassemble your device, follow these instructions in reverse order.
