INTRODUCTION

The WiFi card enables you to access the internet wirelessly and on-the-go, instead of being connected to an Ethernet cable. If your WiFi card is broken or malfunctioning, it will need to be replaced.

TOOLS:

- [Phillips #00 Screwdriver](#) (1)
- [Spudger](#) (1)

Step 1 — WiFi Card

- Use the screwdriver to remove the ten 2.5mm Phillips #00 screws.
- Remove the back panel of the laptop.

Step 2

- Locate the WiFi card once you've removed the back panel.

Step 3

- Remove the two 2.5 mm Phillips #00 screws.

Step 4

- Remove the two wires connected to the WiFi card using a nylon spudger.

Step 5

- Gently lift up the WiFi card to remove it.

To reassemble your device, follow these instructions in reverse order.
