

# Samsung WB2200F Face-plate Replacement

This guide will describe how to remove the face-plate

Written By: James Julian

## INTRODUCTION

This guide will show how to remove the face-plate of the Samsung WB2200F, and can be used to replace a broken face-plate or replace internal components of the camera

### TOOLS:

- JIS Driver Set (1)

## Step 1 — Battery

- Place the camera upside down on a hard surface such as a table. Make sure that the battery compartment is visible.

## Step 2

- Twist the nob counter-clockwise while pushing cover to the left. Then pull the cover up to reveal the battery.

## Step 3

- Slide the blue tab to the right to release the battery.

## Step 4

- Carefully slide the battery out of the camera. It can then be replaced with a new battery.

## Step 5 — Face-plate

- Remove the 6mm screws located on the bottom and sides of the camera using the using the screw driver with the JIS size 000 head.

## Step 6

- Remove the two 6mm screws located underneath the battery cover using the same screw driver with the JIS size 000 head.

## Step 7

- Carefully pry the face-plate away from the body of the camera, starting from the battery compartment. It should come off without too much trouble, although it may require force.
- *i* Make sure to not damage any of the electronic components of the camera

To reassemble your device, follow these instructions in reverse order.
