

# Sanitaire SC684 brush roller replacement or cleaning

Written By: Caycie Pascual

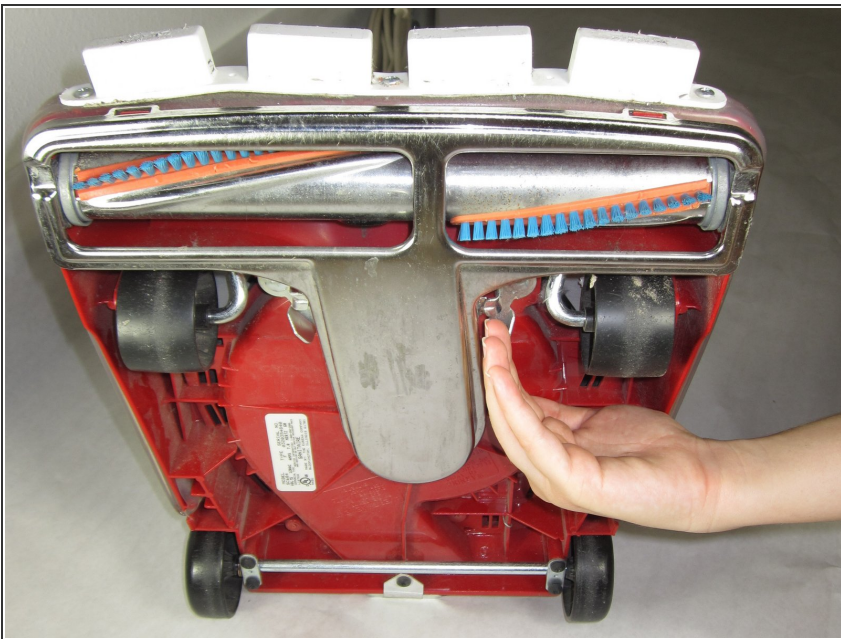

## Step 1 — Belt

 Be sure to unplug the vacuum cleaner before disassembling to prevent electric shock.

- Lay vacuum on its back

## Step 2

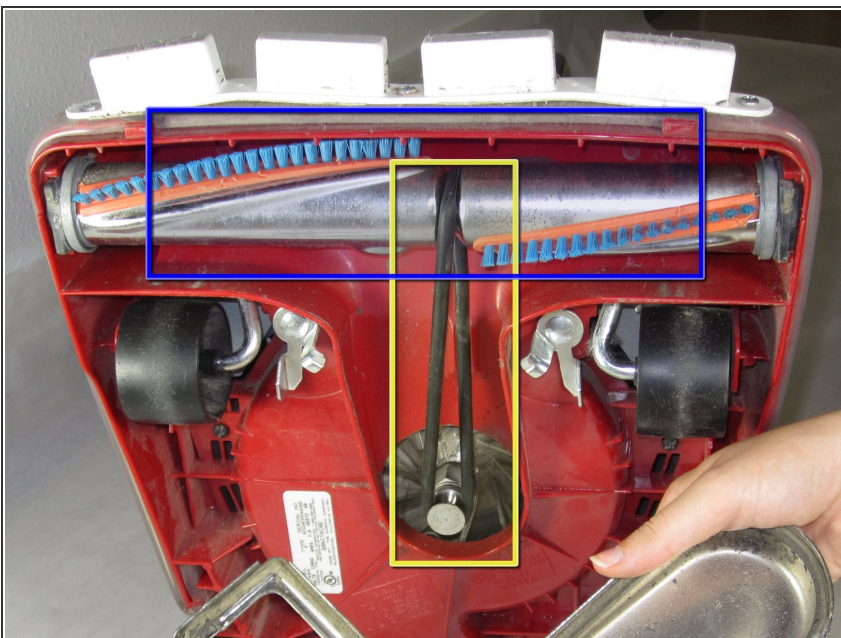

- Find the bottom metal plate and identify the two latches on either side of the vacuum.
- Detach the two latches on either side of the vacuum by pulling outwards towards the wheels.

### Step 3

- Lift off the metal plate by pulling it towards you.

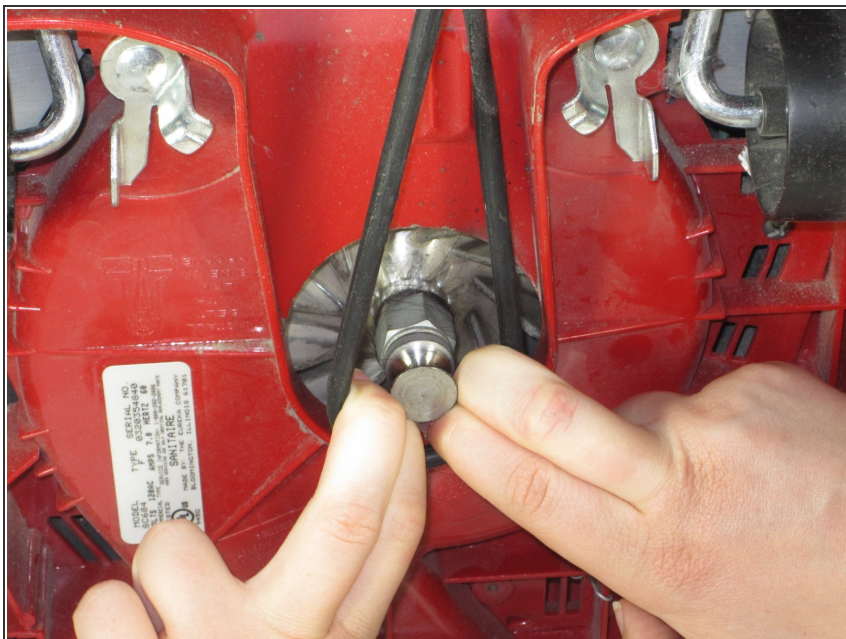

### Step 4

- Identify the belt and brush roller.
- The belt is a black circle made of rubber.
- The brush roller has bristles and is tube shaped.

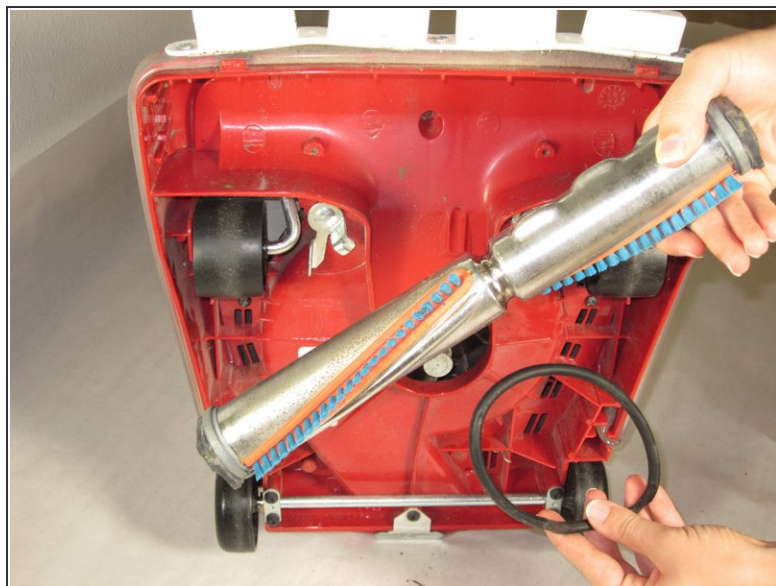

## Step 5

- Slide the belt off of the circular knob.

## Step 6

- Pull brush roller out and detach the belt off the brush roller.

To reassemble your device, follow these instructions in reverse order.
