

Screen Alignment Process

Perform the screen alignment process for the HTC Fortress.

Written By: Lucas David

INTRODUCTION

Some screen alignment and display issues can be solved by running a simple screen alignment process, accessible through you phone's settings.

This guide will take you through the steps of realigning the screen of the HTC Fortress. You will need to perform several actions involving the phone's user interface and stylus.

Step 1 — Screen Alignment Process

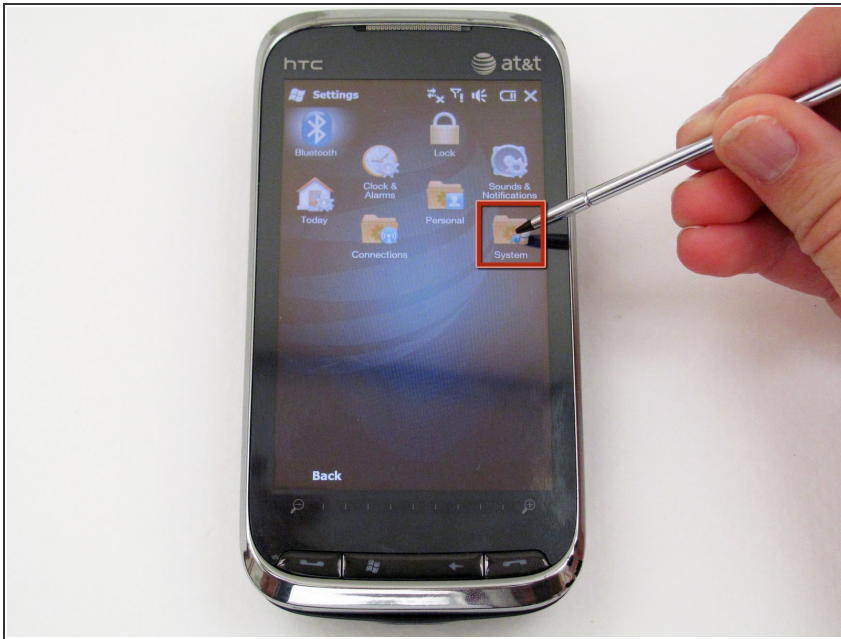

- With the phone powered on and at the home screen, tap "Start".

Step 2

- Tap "Settings".

Step 3

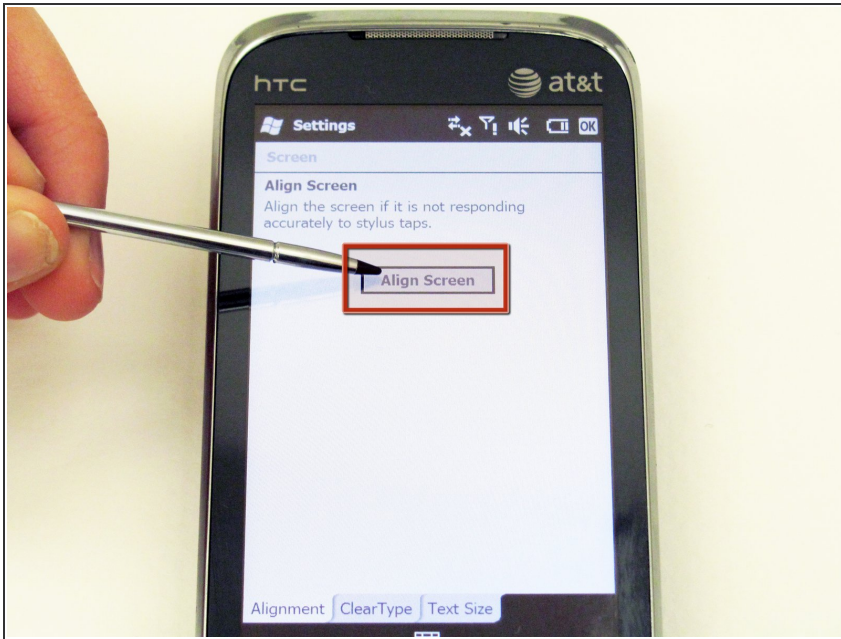

- Tap "System".

Step 4

- Tap "Screen".

Step 5

- Now tap "Align Screen". This will initiate the Screen Alignment Process on your phone. Follow the instructions on the screen.
- ⚠ The Screen Alignment Process must be completed with the phone stylus only. This will ensure proper alignment of the phone's screen.

Your HTC Fortress' screen is now properly aligned.
