

# Shark Navigator Lift-Away Deluxe NV360 Foam and Felt Filters Replacement

How to replace the foam and felt filters in Shark Navigator Lift-Away Deluxe NV360 vacuum.

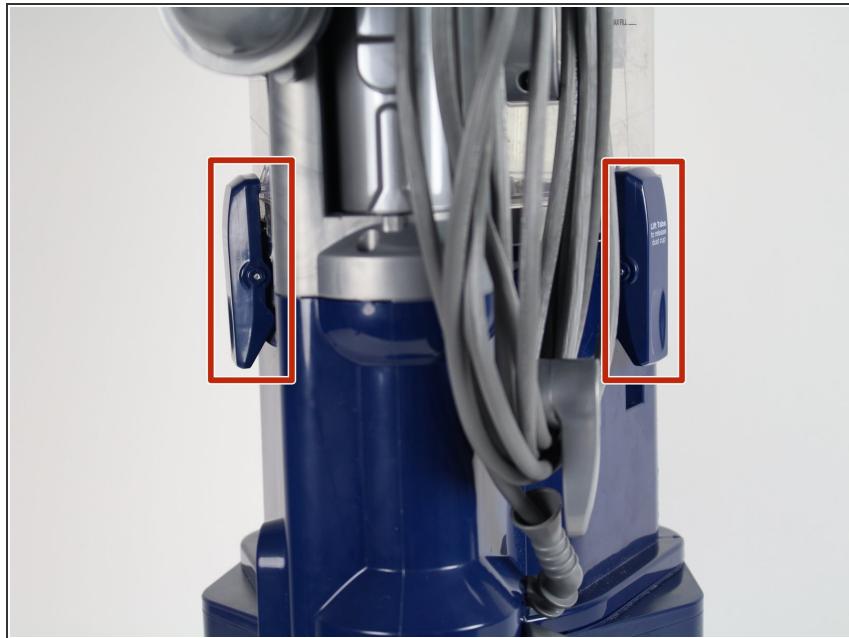

Written By: Pramika Kumar

## INTRODUCTION

Replacing these filters can help reduce the abnormal noise and improve the smell of the vacuum.

## Step 1 — Foam and Felt Filters

- Locate the latches on the side of the dust cup, the clear plastic chamber in the center of the vacuum.

## Step 2

- Pull the bottom of the latch with your hand in an upward direction.
- Lift the top of the latch up and away from the dust cup using your hand.
- Repeat the above steps with the latch on the other side of the dust cup.

## Step 3

- Lift the dust cup up and away by its handle on the top with your hands.

## Step 4

- Lift the foam filter up, out, and away with your hands.

## Step 5

- Lift the felt filter up, out, and away with your hands by the tab on the top.

To reassemble your device, follow these instructions in reverse order.
