INTRODUCTION

A damaged hose will not allow the vacuum to work properly. This guide will show how to detach the hose from the vacuum.

Step 1 — Hose

- Locate the upper connection of the hose found directly below the base of the handle. Push in the the tab on the outside of the tube with your thumb.

- Pull down on the tube while maintaining pressure on the tab.

- Separate the upper connection of the tube from the housing, releasing the hose.

Step 2

- Locate the lower attachment of the hose found in the bottom left corner.

- Pull the hose down towards the floor, releasing the hose from the hose guide.

Step 3

- Pull up on the hose pipe located on the right side of the vacuum firmly.

- Lift the hose pipe upwards and all the way through the plastic guide ring.

To reassemble your device, follow these instructions in reverse order.
