INTRODUCTION

How to remove the side panel on the HP Pavilion p6 desktop computer.

🔧 TOOLS:

- Essential Electronics Toolkit (1)

This document was generated on 2019-10-03 03:20:30 PM (MST).

Step 1 — Side Panel Removal

ⓘ Before you start make sure that all of the leads have been disconnected from the computer.

⚠ It is strongly recomended to wait at least 15 minutes after turning it off to allow the computer and internal components to cool down.

● It is recomended to lay the computer down with the pull tab at the top to allow it to be easily opened.

📌 It is also worth mentioning at this point that for complete safety when working inside the computer that wearing an anti-static band and touching a grounded metal object before starting is good practice.

Step 2

● In order to remove the side panel a single screw needs to first be removed.

ⓘ The side panel can then be pulled towards the back of the computer using the pull tab provided.

ⓘ The panel then needs to be rotated as showen in order to remove it from the computer.
