

# Smartab STJR700 Screen/Digitizer Replacement

This replacement will improve the touch screen performance if your screen was cracked.

Written By: Tianna Edwards

## TOOLS:

- [Flathead 3/32" or 2.5 mm Screwdriver](#) (1)
- [iFixit Opening Tools](#) (1)

## PARTS:

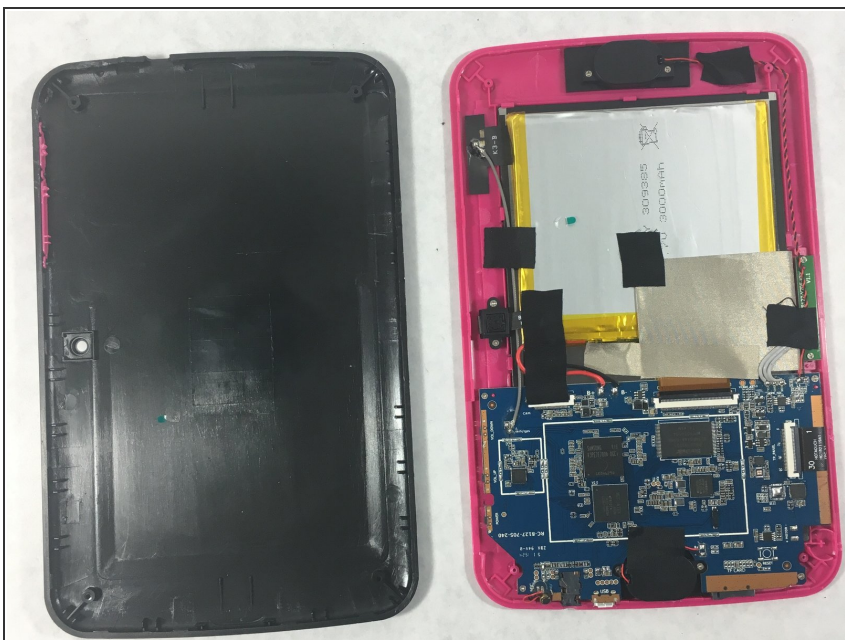

- [Screen Replacement](#) (1)

## Step 1 — Screen/Digitizer

- Use the screwdriver and the J10 tip to unscrew the back of the device. There are four screws; one on each corner.

## Step 2

- Separate the pack of the device from the front panel exposing the digitizer along with the other electronic components.

### Step 3

- Remove the circuit board from the front panel and screen, leaving the digitizer and circuit board intact.
- Separate the existing, damaged glass from the front panel.

To reassemble your device, follow these instructions in reverse order.
