

# Smok Mag 225 Vape Coil Replacement

Use this guide to replace a coil for a Smok Mag 225 Vape.

Written By: Victoria Arroyo

## INTRODUCTION

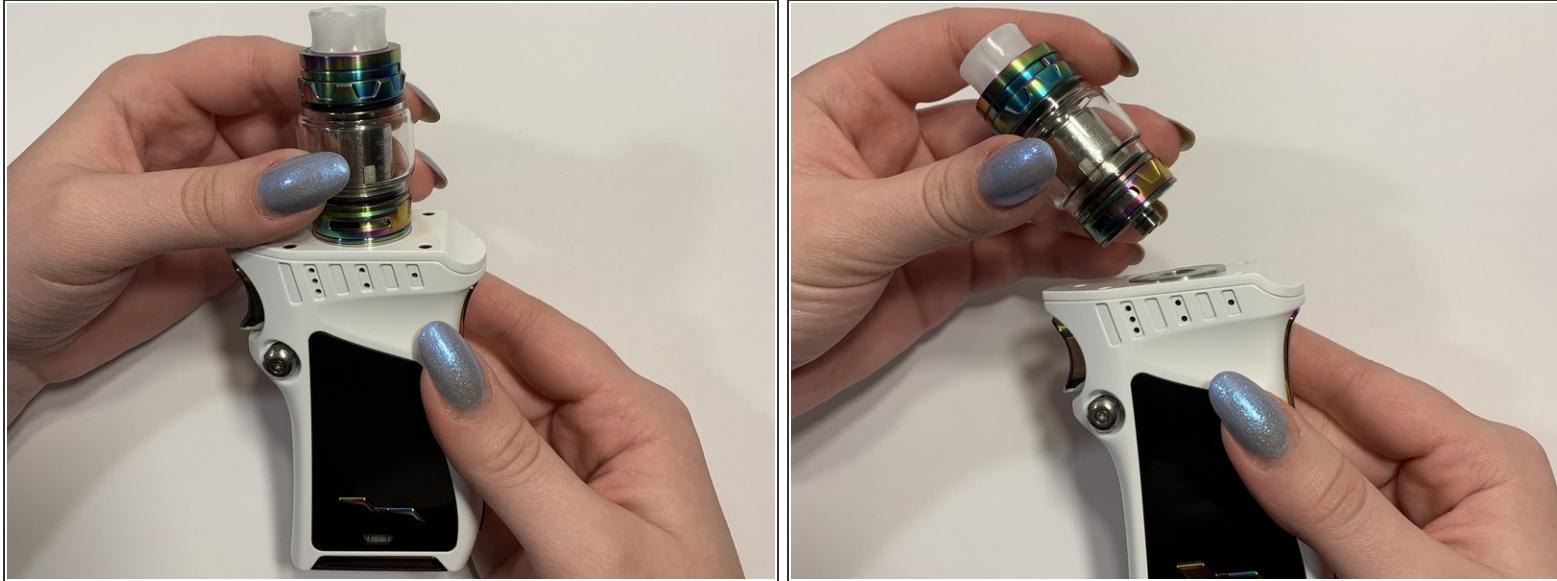

The Smok Mag 225 Vape is a good choice for beginners of the hobby along with people who have been enjoying it for years. The coil only last so long, and one might not know how to replace it. The coil is easy to replace but there are no guides on it. Beginners may go to vape shops or ask friends to help them replace the coil since they would not know how to do it. It is essential that the coil is replaced or the juice will start to become tainted and unhealthy to breathe in. With this guide, the reader can replace their own coil in no time.

## PARTS:

- [TFV12 Prince Coil \(1\)](#)

## Step 1 — Coil

- Unscrew the tank from the mod.

 Allow vape to cool before starting as surfaces may be hot.

## Step 2

- Make sure there is no vape juice in the tank.
- You may dispose of any excess juice by pouring it into the trash.

## Step 3

- Disconnect the filter and the atomizer from the bubble tank.
- Take this opportunity to clean the bubble and atomizer while the components are separated.

## Step 4

- Unscrew the coil from the filter.

## Step 5

- Throw the old coil away.

## Step 6

- Screw the new coil into the filter.

To reassemble your device, follow these instructions in reverse order.
