

# Sony Alpha ILCE-6000 E-mount Replacement

If there is a problem mounting the lens onto your Sony Alpha ILCE-6000, this guide will help you replace the E-mount ring.

Written By: Yirga Yilma

## INTRODUCTION

If there is a problem mounting the lens onto your Sony Alpha ILCE-6000 , this guide will help you replace the E-mount ring.

### TOOLS:

- [Phillips #00 Screwdriver](#) (1)

## Step 1 — Lens

- Turn off camera by turning the switch to OFF.

## Step 2

- Use the finger, press and hold the release black circle button ( on the bottom ) next to the lens on the front of the camera.

## Step 3

- Using the left hand or the right hand to hold the camera body, other hand twist the lens counterclockwise and pull it off.
- ☒ Align the white dot of the lens to the white dot on the camera mount to completely replace.

## Step 4 — E-mount Replacement

- Locate the E-mount on the front of the camera

## Step 5

- Take a Philips head 00 screw to remove the four of the 5.1mm screws located on the E-mount.

## Step 6

- After removing the screws, pull off the E-mount metal ring gently and wiggle it until its free.
- Remove the plastic ring located under the metal ring.

**⚠** Do not remove the metal piece that is located behind the plastic ring.

## Step 7

- Replace the plastic E-mount ring with a new one.

To reassemble your device, follow these instructions in reverse order.
